# WELCOME & CONGRATULATIONS

## Product Registration Register Your Product

The **PRODUCT REGISTRATION CARD** should be filled in completely, signed and returned to Electrolux Home Products.

Congratulations on your purchase of a new appliance! At **Electrolux Home Products**, we are very proud of our product and are completely committed to providing you with the best service possible. Your satisfaction is our number one priority.

We know you'll enjoy your new appliance and **Thank You** for choosing our product. We hope you consider us for future purchases.

## PLEASE CAREFULLY READ AND SAVE THESE INSTRUCTIONS

This Use & Care Manual contains general operating instructions for your appliance and feature information for several models. Your product **may not** have all the described features. The graphics shown are representative. The graphics on your appliance may not look exactly like those shown. These instructions are not meant to cover every possible condition and situation that may occur. Common sense and caution must be practiced when installing, operating and maintaining any appliance.

## Serial Plate Location

**Please record your model and serial numbers below for future reference.**

Model Number: \_\_\_\_\_

Serial Number: \_\_\_\_\_

Purchase Date: \_\_\_\_\_

## NOTE

Please attach sales receipt here for future reference.

# IMPORTANT SAFETY INSTRUCTIONS

**Read all instructions before using this appliance.**  
**Save these instructions for future reference.**

## DEFINITIONS

 This is the safety alert symbol. It is used to alert you to potential personal injury hazards. Obey all safety messages that follow this symbol to avoid possible injury or death.

### **WARNING**

**This symbol will help alert you to situations that may cause serious bodily harm, death or property damage.**

### **CAUTION**

**This symbol will help alert you to situations that may cause bodily injury or property damage.**

### **IMPORTANT**

IMPORTANT indicates installation, operation or maintenance information which is important but not hazard-related.

### **WARNING**

- All appliance can tip.
- Injury to persons could result.
- Install anti-tip bracket packed with your appliance.
- See Installation Instructions.

**To reduce the risk of tipping, the appliance must be secured by properly installed anti-tip bracket provided with the unit. Refer to the Installation Instructions for proper anti-tip bracket installation.**

This unit has been tested and found to comply with the limits for a class B digital device, pursuant to Part 18 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This unit generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However there is no guarantee that interference will not occur in a particular installation. If this unit does cause harmful interference to radio or television reception, which can be determined by turning the unit off and on, the user is encouraged to try to correct the interference by one or more of the following

measures:

- Reorient or relocate the receiving antennae.
- Increase the distance between the unit and receiver.
- Connect the unit into an outlet or a circuit different from that to which the receiver is connected.

### **CAUTION**

Persons with a pacemaker or similar medical device should exercise caution using or standing near an induction unit while it is in operation, as the electromagnetic field may affect the working of the pacemaker or similar medical device. It would be advisable to consult your Doctor or the pacemaker or similar medical device manufacturer about your particular situation.

- Remove all tape and packaging wrap before using the appliance. Destroy the carton and plastic bags after unpacking the appliance. Never allow children to play with packaging material. Do not remove the wiring label and other literature attached to the appliance. Do not remove model/serial number plate.
- **Proper Installation. Be sure your appliance is properly installed and grounded by a qualified technician in accordance in the United States with the National Electrical Code ANSI/NFPA No. 70-latest edition, and local code requirements, and in Canada with CSA C22.1 PART 1-latest edition and local code requirements.** Install only per installation instructions provided in the literature package for this range.  
Ask your dealer to recommend a qualified technician and an authorized repair service. Know how to disconnect the electrical power to the appliance at the circuit breaker or fuse box in case of an emergency.
- **User Servicing. Do not repair or replace any part of the appliance unless specifically recommended in the manuals.** All other servicing should be done only by a qualified technician to reduce the risk of personal injury and damage to the appliance.
- **Never modify or alter the construction of an appliance by removing leveling legs, panels, wire covers, anti-tip brackets/screws, or any other part of the product.**

### **WARNING**

**Stepping, leaning, sitting or pulling down on the door or the drawer of this appliance can result in serious injuries and also cause damage to the appliance.** Do not allow children to climb or play around the appliance. The weight of a child on an open door may cause the appliance to tip, resulting in serious burns or other injury. An open drawer when hot may cause burns.

## IMPORTANT SAFETY INSTRUCTIONS

### WARNING

Do not use the oven or warm & serve drawer (if equipped) for storage.

- **Storage in or on Appliance.** Flammable materials should not be stored in an oven, near surface burners or in the warm & serve drawer (if equipped). This includes paper, plastic and cloth items, such as cookbooks, plastic ware and towels, as well as flammable liquids. Do not store explosives, such as aerosol cans, on or near the appliance. Flammable materials may explode and result in fire or property damage.

### CAUTION

Do not store items of interest to children in the cabinets above the appliance. Children climbing on the cooktop to reach items could be seriously injured.

- **Do not leave children alone.** Children should not be left alone or unattended in the area where an appliance is in use. They should never be allowed to sit or stand on any part of the appliance.
- **DO NOT TOUCH SURFACE UNITS, AREAS NEAR THESE UNITS, OVEN HEATING ELEMENTS OR INTERIOR SURFACES OF THE OVEN OR WARMER DRAWER (if equipped).** Both surface units and oven heating elements may be hot even though they are dark in color. Areas near surface units may become hot enough to cause burns. During and after use, do not touch, or let clothing or other flammable materials touch these areas until they have had sufficient time to cool. Among these areas are the cooktop, surfaces facing the cooktop, the oven vent openings and surfaces near these openings, oven door and window.
- **Wear Proper Apparel.** Loose-fitting or hanging garments should never be worn while using the appliance. Do not let clothing or other flammable materials contact hot surfaces.

### WARNING

NEVER use your appliance as a space heater to heat or warm the room.

- **Do Not Use Water or Flour on Grease Fires.** Smother the fire with a pan lid, or use baking soda, a dry chemical or foam-type extinguisher.
- **When heating fat or grease, watch it closely.** Fat or grease may catch fire if allowed to become too hot.
- **Use Only Dry Pot holders.** Moist or damp pot holders on hot surfaces may result in burns from steam. Do not let the pot holders touch hot surface units. Do not use a towel or other bulky cloth instead of a pot holder.

- **Do Not Heat Unopened Food Containers.** Buildup of pressure may cause the container to burst and result in injury.
- **Remove the oven door from any unused appliance if it is to be stored or discarded.**

### IMPORTANT

Do not attempt to operate the appliance during a power failure. If the power fails, always turn off the unit. If the unit is not turned off and the power resumes, the appliance will not operate and an error message will be displayed. Once the power resumes, reset the clock and the oven function.

### CAUTION

Electronic controllers can be damaged by cold temperatures. When you use your appliance for the first time, or if it has not been used for a long period of time, make sure that it has been exposed to a temperature above 0°C/32°F for at least 3 hours before connecting it to the power supply.

## IMPORTANT INSTRUCTIONS FOR USING YOUR COOKTOP

- **Know which knob controls each surface heating unit.** Place pan of food on the element before turning it on, and turn the element off before removing the pan.
- **Use Proper Pan Size**—This appliance is equipped with one or more surface burners of different sizes. Select utensils having flat bottoms large enough to cover the surface unit. The use of undersized utensils will expose a portion of surface heating unit to direct contact and may result in ignition of clothing. Proper relationship of utensil to the surface will also improve efficiency.
- **Utensil Handles Should Be Turned Inward and Should Not Extend Over Adjacent Surface Units**—To reduce the risk of burns, ignition of flammable materials, and spillage due to unintentional contact with the utensil. The handle of the utensil should be positioned so that it is turned inward, and does not extend over adjacent surface unit.
- **Do not use Searing Grill on the cooktop**—The Searing grill is not designed for use on the cooktop. Doing so may result in a fire.
- **Never Leave Surface Units Unattended**—Boilovers cause smoking and greasy spillovers that may ignite, or a pan that has boiled dry may melt.
- **Protective Liners**—Do not use aluminum foil to line oven bottom or any other part of the appliance. Only use aluminum as recommended for baking if used as a cover placed on the food. Any other use of protective liners or aluminum foil may result in a risk of electric shock or fire or a short circuit.

## IMPORTANT SAFETY INSTRUCTIONS

- **Glazed Cooking Utensils**—Only certain types of glass, glass/ceramic, ceramic, earthenware, or other glazed utensils are suitable for cooktop service without breaking due to the sudden change in temperature. Check the manufacturer's recommendations for cooktop use.
- **Ventilating hood.** The ventilating hood above your cooking surface should be cleaned frequently, so the grease from cooking vapors does not accumulate on the hood or filter.
- **Do Not Use Decorative Surface Burner Covers.** If an element is accidentally turned on, the decorative cover will become hot and possibly melt. Burns will occur if the hot covers are touched. Damage may also be done to the cooktop.

### FOR GLASS COOKTOP ONLY

- **Do Not Clean or Operate a Broken Cooktop**— If cooktop should break, cleaning solutions and spillovers may penetrate the broken cooktop and create a risk of electric shock. Contact a qualified technician immediately.
- **Clean Cooktop Glass with Caution**— If a wet sponge or cloth is used to wipe spills on a hot cooking area, be careful to avoid a steam burn. Some cleaners can produce harmful fumes if applied to a hot surface.
- **Avoid Scratching the Cooktop Glass with Sharp Objects.**
- **Do Not Let Pans Boil Dry.** This may cause permanent damage in the form of breakage, fusion, or marking that can affect the ceramic-glass cooktop. (This type of damage is not covered by your warranty).

### IMPORTANT SAFETY INSTRUCTIONS FOR USING YOUR OVEN

- **Use Care When Opening Oven Door or Warm & Serve Drawer (if equipped)**—Stand to the side of the appliance when opening the door/drawer of a hot appliance. Let hot air or steam escape before you remove or replace food in the oven/drawer.
- **Keep Oven Vent Ducts Unobstructed.** The oven is vented at the front above the oven door. Touching the surfaces in this area when the oven is operating may cause severe burns. Also, do not place plastic or heat-sensitive items on or near the oven vent. These items could melt or ignite.

#### **WARNING**

**NEVER cover any slots, holes or passages in the oven bottom or cover an entire rack with materials such as aluminum foil.** Doing so blocks air flow through the oven and may cause carbon monoxide poisoning. Aluminum foil linings may trap heat, causing a fire hazard.

- **Placement of Oven/Warm & Serve Drawer (if equipped) Racks.** Always place oven/Warm & Serve Drawer (if equipped) racks in desired location while

appliance is cool. Remove all utensils from the rack before removing rack. If rack must be moved while oven is hot, use extreme caution. Use pot holders and grasp the rack with both hands to reposition. Do not let pot holders contact the hot oven element or interior of the oven/Warm & Serve Drawer (if equipped).

- **Do not use a broiler pan without its insert.** Broiler pan and grid allow dripping fat to drain and be kept away from the high heat of the broiler.
- **Do not cover the broiler grid or oven bottom with aluminum foil.** Exposed fat and grease could ignite.
- **Do not touch a hot oven light bulb with a damp cloth.** Doing so could cause the bulb to break. Disconnect the appliance or shut off the power to the appliance before removing and replacing the bulb.

### IMPORTANT SAFETY INSTRUCTIONS FOR CLEANING YOUR OVEN

- **Clean the appliance regularly to keep all parts free of grease that could catch fire.** Exhaust fan ventilation hoods and grease filters should be kept clean. Do not allow grease to accumulate. Greasy deposits in the fan could catch fire. Refer to the hood manufacturer's instructions for cleaning.
- **Cleaners/Aerosols**—Always follow the manufacturer's recommended directions for use. Be aware that excess residue from cleaners and aerosols may ignite causing damage and/or injury.
- **Clean in the self-cleaning cycle only the parts of the appliance listed in this Owner's Guide.** Before using the self-cleaning cycle of the appliance, remove all utensils stored in the appliance.
- **Do not clean the oven door gasket.** The door gasket is essential for a good seal. Care should be taken not to rub, damage or move the gasket.
- **Do not use oven cleaners.** No oven cleaner or oven liner protective coating of any kind should be used in or around any part of the appliance.
- **Remove oven racks.** Oven racks color will change if left in the oven during a self-cleaning cycle.

#### **CAUTION**

The health of some birds is extremely sensitive to the fumes given off during the self-clean cycle of any wall oven. Move birds to another well ventilated room.

#### **IMPORTANT SAFETY NOTICE**

The California Safe Drinking Water and Toxic Enforcement Act requires the Governor of California to publish a list of substances known to the state to cause cancer, birth defects or other reproductive harm, and requires businesses to warn customers of potential exposure to such substances.

## FEATURES AT A GLANCE

### Your Built-in Range Features:

1. Electronic oven control with kitchen timer.
2. Digital displays for element controls.
3. Keep warm zone control.
4. Warm & serve drawer control.
5. Left front element control.
6. Left rear element control.
7. Right rear element control.
8. Right front element control.
9. Element on indicator light.
10. Cooktop on indicator light.
11. Automatic oven door light switch.
12. Self-clean door latch.
13. Oven vent.
14. 2 Oven interior light with removable cover.
15. Broil element.
16. Self-cleaning oven interior.
17. Convection bake cooking dual fan system.
18. Adjustable interior oven rack(s).
19. Large 3-piece oven door handle.
20. Full width oven door with window.
21. Warm & serve drawer.
22. 7" single radiant element.
23. Keep warm radiant element.
24. 6" induction element.
25. Bridge radiant element.
26. 7" single radiant element.
27. 10" induction element.
28. Ceramic glass cooktop.

### Induction Element Characteristics (Right Front and Rear Elements)

**A COOLER COOKTOP-** A unique feature of the Induction Cooktop is whether turned ON or OFF, the cooktop surface remains cooler than standard ceramic cooktops.

**MAGNETIC DETECTOR-** The coil sensor automatically detects whether the pan is magnetic and eliminates accidental "turn-On."

**PAN SIZE DETECTION-** The pan recognition sensor automatically detects and adapts the Cooking Zones to the pan sizes in use.

**EFFICIENT-** Induction cooking heats faster while using less energy. Induction power levels are quick to boil and when simmering.

## BEFORE SETTING SURFACE CONTROLS

### About the ceramic glass cooktop

The ceramic cooktop has inductors and radiant surface elements located below the surface of the glass. The design of the ceramic cooktop outlines the area of the surface element underneath. **Be sure** to match the pan size with the diameter of the element outline on the cooktop and only flat-bottom cookware should be used.

The type and size of cookware, the number of surface elements in use and their settings, are all factors that will affect the amount of heat that will spread to areas beyond the surface elements. The areas surrounding the elements may become **hot enough to cause burns**.

#### NOTE

Please read detailed instructions for ceramic glass cooktop cleaning in the **General Care & Cleaning** section and **Before You Call** checklist section of this Use and Care Guide.

### About the radiant surface elements

The element temperature rises gradually and evenly. As the temperature rises, the element will glow red. To maintain the selected setting the element will cycle on and off. The heating element retains enough heat to provide a uniform and consistent heat during the off cycle. For efficient cooking, turn off the element several minutes before cooking is complete. This will allow residual heat to complete the cooking process.

#### NOTE

Radiant elements have a limiter that allows the element to cycle ON and OFF, even at the HI setting. This helps to prevent damage to the ceramic smooth top. Cycling at the HI setting is normal and can occur if the cookware is too small for the radiant element or if the cookware bottom is not flat.

Be sure to read detailed instructions for ceramic glass cooktop cleaning in the **General Care & Cleaning** section and **Before You Call** checklist section of this Use and Care Guide.

### Cooktop ON & Element ON indicator lights

Your appliance is equipped with two different types of surface indicator lights (see Feature at a Glance section for locations) that will glow on the control panel; the Cooktop ON indicator light and the Element ON indicator lights.

The **Cooktop ON** indicator light is located on the control panel between the warmer zone touch pads and the upper left radiant element control knob and will glow when any surface element is turned ON.

The **Element ON** indicator lights are located between the control knobs, on each side of the control panel. It will glow when its associated surface element is turned ON. On the induction (right side) controls, the Element ON indicator light will turn green if the Power Sharing feature is activated (see the Setting Induction Surface Controls section for more information).

### Locations of the surface radiant & induction elements

Your cooktop is equipped with radiant and induction surface elements with different wattage ratings. The ability to heat food quicker and in larger volumes increases as the element wattage increases.

- Two 7 inch radiant elements are located at the left front and rear positions.
- One mid-position radiant element located between left front and rear element. Connects with front element to form **Bridge** element.
- One 6 inch induction element located at the right rear position.
- One 10 inch induction element located at the right front position.

## BEFORE SETTING SURFACE CONTROLS

### Using proper cookware with radiant elements

The size and type of cookware used will influence the setting needed for best cooking results. Be sure to follow the recommendations for using proper cookware as illustrated in Figures 1 & 2.

Cookware should have flat bottoms that make good contact with the entire surface heating element (Figure 1). Check for flatness by rotating a ruler across the bottom of the cookware (Figure 2).

#### \*CORRECT

- Flat bottom and straight sides.
- Tight fitting lids.
- Weight of handle does not tilt pan. Pan is well balanced.
- Pan sizes match the amount of food to be prepared and the size of the surface element.
- Made of a material that conducts heat well.
- Easy to clean.
- Always match pot diameter to element surface diameter.

#### INCORRECT

- Curved and warped pan bottoms.

- Pan overhangs element by more than one-half inch.

- Pan is smaller than element.

- Heavy handle tilts pan.

Figure 1

Figure 2

### Cookware material types for radiant elements

The cookware material determines how evenly and quickly heat is transferred from the surface element to the pan bottom. The most popular materials available are:

**Aluminum-** Excellent heat conductor. Some types of food will cause it to darken (Anodized aluminum cookware resists staining & pitting). If aluminum pans slide across the ceramic glass cooktop, they may leave metal marks which will resemble scratches. Remove these marks immediately.

**Copper-** Excellent heat conductor but discolors easily. May leave metal marks on ceramic glass (see Aluminum above).

**Stainless steel-** Slow heat conductor with uneven cooking results. Is durable, easy to clean and resists staining.

**Cast iron-** A poor heat conductor however will retain heat very well. Cooks evenly once cooking temperature is reached. Not recommended for use on ceramic cooktops.

**Porcelain-enamel on metal-** Heating characteristics will vary depending on base material. Porcelain-enamel coating must be smooth to avoid scratching ceramic cooktops.

**Glass-** Slow heat conductor. Not recommended for ceramic cooktop surfaces because it may scratch the glass.

## BEFORE SETTING SURFACE CONTROLS

### Cookware recommendations for inductions elements

Be sure to follow the following recommendations for using cookware as shown:

#### INCORRECT

- Cookware not centered on Cooking Zone surface.

- Curved or warped pan bottoms or sides.

- Pan does not meet the minimum size required for the Cooking Zone used.

- Pan bottom rests on cooktop trim or does not rest completely on the cooktop surface.

- Heavy handle tilts pan.

#### CORRECT

- Cookware centered correctly on Cooking Zone surface.

- Flat pan bottom & straight sides.

- Pan size meets or exceeds the recommended minimum size for the Cooking Zone.

- Pan rests completely on the Cooktop surface.

- Pan is properly balanced.

Fig. 1

### NOTE

ANY one of the incorrect conditions listed above in Fig. 1 may be detected by the sensors located below the ceramic cooktop surface. If the cookware does not meet any of these conditions, one or more of the Cooking Zones will not heat indicated by a flashing power level in the digital display for that affected zone. Correct the problems before attempting to reactivate the cooktop.

### Selecting surface cooking cookware for induction elements

The cookware used with the Induction Cooktop should have flat bottoms that make good contact with the entire surface of the Cooking Zone. Check for flatness by rotating a ruler across the bottom of the cookware (See Fig. 2). Be sure to follow all the recommendations for using cookware.

Figure 2

#### Also remember to:

- Use cookware made with the correct material type for Induction Cooking.
- Use quality cookware with heavier bottoms for better heat distribution allowing for more even cooking results.
- The pan size should match the amount of food being prepared.
- Do not let pans boil dry. This may cause permanent damage in the form of breakage, fusion, or marring that can affect the ceramic cooktop. (This type of damage is not covered by your warranty).
- Do not use dirty pans with grease buildup. Always use pans that are easy to clean after cooking.

### CAUTION

- The Cooking Zones may appear to be cool while turned ON and after they have been turned OFF. The glass surface may be HOT from residual heat transferred from the cookware and burns may occur.
- DO NOT SLIDE Cookware across the cooktop surface. Doing so may permanently damage the appearance of the ceramic cooktop.
- DO NOT TOUCH HOT COOKWARE or PANS directly with hands. Always use oven mitts or pot holders to protect hands from burns.

Prior to using your cooktop for the first time, apply the recommended cooktop cleaning creme to the ceramic surface. Buff with a non-abrasive cloth or pad. This will make cleaning easier when soiled from cooking. The special cooktop cleaning cream leaves a protective finish on the glass to help prevent scratches and abrasions.

## BEFORE SETTING SURFACE CONTROLS

### Use the correct cookware type for induction elements

For the induction zones, the magnetic Cooking Zone sensors located below the cooktop surface require the use of cookware made with magnetic material in order to start the heating process on any of the Cooking Zones.

When purchasing pans, look for cookware specifically identified by the manufacturer for use with Induction cooktops. If you are not sure, use a magnet to test whether the cookware type will work. If a magnet sticks to the bottom of the cookware, the material type is correct for Induction cooking (See Fig. 1).

Fig. 1

It is recommended to always use heavier high quality stainless steel cookware on your Induction Cooktop surface. This will greatly reduce the possibility of developing scratches on the ceramic surface.

Even quality cookware can scratch the cooktop surface, especially if cookware is slid over the ceramic cooktop surface without being lifted up. Over time sliding **ANY** type of cookware over the ceramic cooktop will likely alter the overall appearance of the cooktop. Eventually the buildup of scratches will make cleaning the surface difficult and degrade the overall appearance of the cooktop.

### Operational Noise

The electronic processes involved with Induction Cooking create some unusual background noises. These noises are normal and part of the Induction Cooking process.

Please note that these noises are more noticeable while cooking at the Power BOOST level. Very loud noises are not part of normal Induction Cooking.

### Use the correct cookware size for induction elements

The Cooking Zones available on the Induction Cooktop require a MINIMUM pan size to be used at each location. The inner ring of each Cooking Zone is your guide to the correct MINIMUM pan size. The pan bottom must FULLY cover the inner ring for proper cooking to occur.

The thicker outer ring at each Cooking Zone is helpful to determine the pan MAXIMUM size. After centering the cookware on the cooktop, make sure the cookware does not extend more than 1/2" beyond the thicker line on the Cooking Zone. The pan must make FULL contact on the glass surface without the bottom of the pan touching the metal cooktop trims.

### NOTE

If a pan made of the correct material is centered properly on any of the active Cooking Zones but is **TOO SMALL**, the power level will flash in the in the digital display and the pan will not heat. After 3 minutes, an "Er" error code will be displayed until the controls are set to **OFF**.

## BEFORE SETTING SURFACE CONTROLS

### The electronic surface element control (ESEC)

The Electronic Surface Element Control (ESEC) feature includes digital display windows. The ESEC feature provides a numeric digital setting for the radiant surface element positions on the cooktop. These settings work the same way as normal knob setting indicators work except the settings are displayed in digital windows.

### The available ESEC display settings

The ESEC control provides various heat levels from **Hi** (Figure 2) to **Lo** (Figure 5) and **OFF** (Figure 1). The settings between **3.0** and **9.5** increase or decrease in increments of .5 (1/2). The settings between **1.2** and **3.0** are Simmer settings which decrease or increase in increments of .2 (1/5) to **Lo** (Figure 5; lowest Simmer setting) for more precise settings at lower heat levels. Use the Recommended Surface Setting Chart to determine the correct setting for the kind of food you are preparing.

### Power Boost Indicator Message (Pb)

When an induction zone is first set at **Hi**, the Power Boost feature will turn on (see Fig. 6). The Power Boost feature is used to bring large quantities of water or food to cooking temperature at the fastest speed possible. The Power Boost feature will give you up to 139% power output for a set amount of time (approx. 10 min).

### Power failure indicator message (PF)

When the range is first plugged in or when the power supply to the range has been interrupted, the ESEC control will display the message "**PF**" (Power Failure; Figure 7). After a few seconds the "**PF**" message will disappear from the display.

### Hot element indicator message (HE)

After using any of the element positions the cooktop will become very hot. Even after turning the control knob to **OFF**, the cooktop will remain hot for some time. The ESEC control monitors the temperature of the cooktop and displays the message "**HE**" (hot element) warning when the cooktop is still too hot to touch (Figure 4). If the **HE** message appears in the window, the control can still be turned ON again for use.

### Error indicator message (Er)

An error message will be displayed (glowing "**Er**") at power up (or after a power failure) if ANY of the surface control knobs were left in the ON positions (Figure 8). If a power failure should occur, be sure to set all of the surface control knobs to the **OFF** position. This will reset the surface controls.

Also, if the induction sensors cannot detect a pan made of the correct material or if the pan is not centered properly or if the pan is too small, the power level will flash in the digital display and the pan will not heat. After 3 minutes, an "**Er**" error code will be displayed until the controls are set to **OFF**.

### Lockout Feature ( - - )

The ESEC feature will not operate during a Self-Clean cycle or when the Lockout feature is active. Whenever the Lockout feature is active, " - - " will appear in any ESEC digital display windows (See Figure 9) to show that all surface elements can not be activated.

Figure 1

Figure 2

Figure 3

Figure 4

Figure 5

Figure 6

Figure 7

Figure 8

Figure 9

Control knobs shown are typical only.

### Surface cooking settings

Use the chart to determine the correct setting for the type of food you are preparing.

**Note:** The size and type of cookware used will influence the setting needed for best cooking results.

Recommended Setting for Surface Element	
Setting	Type of Cooking
POWER BOOST (Pb)	Start most foods; bring water to a boil and pan broiling.
HIGH (8-Hi)	Continue a rapid boil; frying, deep fat frying.
MEDIUM (5-7)	Maintain a slow boil; thicken sauces and gravies; steaming vegetables.
MEDIUM LOW (2 - 4)	Keep foods cooking; poaching and stewing.
LOW (LO)	Keep warm, melting and simmering.

### NOTE

The elements have a limiter that allows the element to cycle on and off, even at the HI setting. This helps to prevent damage to the ceramic smooth top. Cycling at the HI setting is normal and can occur if the cookware is too small for the element or if the cookware bottom is not flat.

## SETTING RADIANT SURFACE CONTROLS

### Single radiant surface element

The cooktop has 1 SINGLE radiant surface element: the **left rear** position (Figures 1). The left rear element may also be used with the Bridge element.

#### To Operate the Single Radiant Surface Elements

1. Place correctly sized cookware on the radiant surface element.
2. Push in and turn the surface control knob in either direction to the desired setting (Figure 2). Start most cooking operations on a higher setting and then turn to a lower setting to finish cooking. Each surface element provides a constant amount of heat at each setting. A glowing red surface heating area extending beyond the bottom edge of the cookware indicates the cookware is **too small** for the surface heating area.
3. When cooking has completed, turn the surface control knob to OFF before removing the cookware.

Figure 1

Figure 2 - Control knob shown is typical only.

#### NOTE

The surface "Element On" indicator lights will glow when one or more elements are turned on. A quick glance at these indicator lights when cooking is finished is an easy check to be sure all surface elements are turned off.

#### NOTE

See Recommended Setting for Surface Element table on page 11.

#### CAUTION

**Do not place plastic items such as salt and pepper shakers, spoon holders or plastic wrappings on cooktop when it is in use.** These items could melt or ignite. Potholders, towels or wooden spoons could catch fire if placed too close to the surface elements.

#### CAUTION

**Do not allow aluminum foil, or ANY material that can melt to make contact with the ceramic glass cooktop.** If these items melt on the cooktop they will damage the ceramic cooktop.

#### CAUTION

Radiant surface elements may appear to have cooled after they have been turned OFF. **HE** (Hot Element) message will turn ON and will continue to glow until the glass cooktop has cooled down to a moderate level. **The glass surface may still be hot** and burns may occur if the glass surface is touched before the indicator light has turned OFF. The message may remain on even though the controls are turned OFF.

# SETTING RADIANT SURFACE CONTROLS

## Bridge surface radiant element

The cooktop is equipped with a "BRIDGE" surface element located at the left front and middle (Fig. 1) positions. The Bridge can be used when cooking with rectangular (like a griddle) or oval shaped cookware. The element will maintain an even temperature setting across both portions of the Bridge. If needed for normal cookware, the Bridge element can work like a single element without the Bridge (Fig. 4). The ● symbol indicates that only the front portion will heat (Fig. 2). The ◐ symbol indicates that both front and middle portions will heat (Fig. 3). You may switch from either coil setting at any time during cooking.

### To Operate the Bridge Surface Element

1. Place correctly sized cookware on the Bridge surface element.
2. Push in and turn the control knob as shown in Figure 2 to heat the front portion of the Bridge element for normal shaped cookware or in Figure 3 for larger or rectangular shaped cookware. Turn the knob to adjust the setting if needed. Start most cooking operations on a higher setting and then turn to a lower setting to finish cooking. Each surface element provides a constant amount of heat at each setting. A glowing red surface heating area extending beyond the bottom edge of the cookware indicates the cookware is **too small**. Please note that not all cookware will fit the Bridge element correctly.
3. When cooking has completed, turn the surface control knob to OFF before removing the cookware.

The BRIDGE element may also be used in combination with the left rear single element (Fig. 6). Because these elements have 2 different controls, one element can be used to cook while the other element may be used to keep food warm.

Figure 2

Figure 3

Figure 4  
Front portion  
only

Figure 5  
Front & Middle  
portions

Figure 6  
Front & Middle  
plus Left Rear

## CAUTION

**Do not place plastic items such as salt and pepper shakers, spoon holders or plastic wrappings on cooktop when it is in use.** These items could melt or ignite. Potholders, towels or wooden spoons could catch fire if placed too close to the surface elements.

**Do not allow aluminum foil, or ANY material that can melt to make contact with the ceramic glass cooktop.** If these items melt on the cooktop they will damage the ceramic cooktop.

## NOTE

The surface "Element On" indicator lights will glow when one or more elements are turned on. A quick glance at these indicator lights when cooking is finished is an easy check to be sure all surface elements are turned off.

## CAUTION

Radiant surface elements may appear to have cooled after they have been turned off. **HE** (Hot Element) message will turn ON and will continue to glow until the glass cooktop has cooled down to a moderate level. **The glass surface may still be hot** and burns may occur if the glass surface is touched before the indicator light has turned OFF. The message may remain on even though the controls are turned OFF.

# SETTING INDUCTION SURFACE CONTROLS

## Operating the induction surface elements

The cooktop is equipped with 2 induction surface elements: the RIGHT FRONT and REAR positions (Figure 1).

### To Operate the Induction Surface Elements

1. Place the correctly sized cookware of the proper material on the induction surface element.
2. Push in and turn the surface control knob in either direction to the desired setting (Figure 2).

**Note:** Turning the knob from Off to Hi will activate the Power Boost feature. The Power Boost feature is used to bring large quantities of water or food to cooking temperature at the fastest speed possible. The Power Boost feature will give you up to 139% power output for a set amount of time (approx. 10 min).

3. Turn the knob to adjust the setting if desired. Start most cooking operations on a higher setting and then turn to a lower setting to finish cooking. Each surface element provides a constant amount of heat at each setting.
4. When cooking has completed, turn the surface control knob to **OFF** before removing the cookware.

### Power Sharing

Your cooktop is equipped with two induction elements within one heating section. The heating section is powered by an independent induction inverter. The two cooking zones in the heating section share the power of the inverter. This is called Power Sharing.

For example, if pans are cooking food items on both Cooking Zones, the last Power Level set will be maintained, while the first pan may experience a slight reduction in the power level setting. The element ON indicator light will turn GREEN when power sharing is enabled.

**POWER SHARING TIPS:** Remember to set the power level for the food item you wish to maintain last (See Fig. 3).

Figure 1

Figure 2

**Control knob shown is typical only.**

Figure 3

### CAUTION

The glass cooktop may appear to have cooled after the elements have been turned OFF. The induction elements do not heat directly the cooktop but heat will be transferred from the cookware to the glass cooktop. **HE** (Hot Element) message will turn ON and will continue to glow until the glass cooktop has cooled down to a moderate level. **The glass surface may still be hot** and burns may occur if the glass surface is touched before the indicator light has turned **OFF**. The message may remain on even though the controls are turned **OFF**.

# SETTING WARM ZONE CONTROLS

## Keep warm zone

The purpose of the keep warm zone is to keep hot cooked foods at serving temperature. Use the keep warm feature to keep cooked foods hot such as: vegetables, gravies, casseroles, soups, stews, breads, pastries and oven-safe dinner plates.

Always start with hot food. It is not recommended to heat cold food on the keep warm zone. All food placed on the keep warm zone should be covered with a lid to maintain quality.

For best results, when warming pastries or breads, the cover should have an opening to allow moisture to escape. **Do not use plastic wrap to cover food. Plastic may melt onto the surface and be very difficult to clean.** Use only plates, utensils and cookware recommended for oven and cooktop use on the keep warm zone.

### To Set the keep warm zone control

NOTE: The controls and indicator light are located on the control panel.

1. Touch the **on•off** pad (Fig. 4) at the keep warm zone control position. The keep warm indicator light will flash.
- Note:** If no further pads are touched within 25 seconds the request to power the keep warm zone ON will clear.
2. At the keep warmer zone controls position touch **^** once to turn ON the power level for HI (Fig. 1) or **v** to turn ON the power level for LO (Fig. 3).
  3. Each touch **^** or **v** will increase or decrease the power levels. The keep warm zone has 5 power levels from HI (Fig. 1) through MED (Fig. 2) to LO (Fig. 3). The power level may be adjusted at any time while the keep warm zone is ON.
  4. When it is time to serve the food, touch the **on•off** pad once to turn the keep warm zone OFF. The keep warm zone indicator light will turn OFF.

## CAUTION

The keep warm zone will not glow red when it is hot, but becomes hot enough to cause burns. Avoid placing hands on or near the keep warm zone until the keep warm zone hot surface indicator light is OFF. Always use potholders or oven mitts when removing food from the keep warm zone as cookware and plates will be hot.

## CAUTION

**Do not place plastic items such as salt and pepper shakers, spoon holders or plastic wrappings on cooktop when it is in use.** These items could melt or ignite. Potholders, towels or wooden spoons could catch fire if placed too close to the surface elements.

**Do not allow aluminum foil, or ANY material that can melt to make contact with the ceramic glass cooktop.** If these items melt on the cooktop they will damage the ceramic cooktop.

### Keep warm zone temperature selection

Refer to the keep warm zone table for recommended heating levels. If a particular food is not listed, start with the medium level, and adjust as needed. Most foods can be kept at serving temperatures by using the medium level.

**Keep warm zone recommended food settings table**

Food Item	Setting
Bacon	HI
Hamburger Patties	HI
Poultry, Pork Chops	HI
Fried Foods, Pizza	HI
Gravies, Casseroles	MED
Vegetables, Eggs	MED
Roasts (Beef, Pork, Lamb)	MED
Biscuits, Pastries	MED
Rolls, hard	MED
Rolls (soft)	LO
Empty Dinner Plates	LO

# BEFORE SETTING OVEN CONTROLS

## Oven vent location

The oven is vented **at the center rear of the cooktop**. When the oven is on, warm air is released through the vent. This venting is necessary for proper air circulation in the oven and good baking results. **DO NOT BLOCK OVEN VENT.** Never close off the openings with aluminium foil or any other material.

## CAUTION

Some models are equipped with a blower which runs in baking and self-cleaning mode to keep all internal components at a cool temperature. The blower may keep running even if the oven has been turned off, until the components have cooled down.

## Air circulation in the oven

If using 1 rack, place in center of oven. If using multiple racks, stagger cookware as shown.

For best air circulation and baking results allow 2-4" (5-10 cm) around the cookware for proper air circulation and be sure pans and cookware do not touch each other, the oven door, sides or back of the oven cavity. The hot air must circulate around the pans and cookware in the oven for even heat to reach around the food.

Single Oven Rack

Multiple Oven Racks

## Arranging oven racks

ALWAYS ARRANGE OVEN RACKS WHEN THE OVEN IS COOL (PRIOR TO OPERATING THE OVEN). Always use oven mitts when using the oven.

**To remove an oven rack**, pull the rack forward until it stops. Lift up front of rack and slide out.

**To replace an oven rack**, fit the rack onto the guides on the oven walls. Tilt the front of the rack upward and slide the rack back into place.

## Recommended rack position

Food	Rack Position
Broiling meats, chicken or fish	3 or 4
Cookies, cakes, pies, biscuits & muffins	
Using a single rack	2 or 3
Using two racks	2 and 4
Using three racks	1, 3(offset), 4
Frozen pies, angel food cake, yeast, bread, 1 or 2 casseroles, small cuts of meat or poultry	1 or 2
Turkey, roast or ham	1 or Offset Rack

Rack positions

## NOTE

Always use caution when removing food from the oven.

## BEFORE SETTING OVEN CONTROLS

### Types of oven racks

Your appliance is equipped with three types of the oven rack, as shown;

- **Flat Handle Oven Rack** (Figure 1).
- **Flat Oven Half Rack** (Figure 2 & 3).
- **Offset Oven Rack** (Figure 4).

**Flat Handle Oven Rack**

Figure 1

**Flat Half Oven Rack - Closed Position**

Figure 2

**Flat Half Oven Rack - Open Position**

Figure 3

**Offset Oven Rack**

Figure 4

### CAUTION

Always use pot holders or oven mitts when adjusting the oven racks. Wait until the oven has completely cooled if possible. Oven racks may be HOT and may cause burns.

The **Flat Oven Handle Rack** has an handle to facilitate the sliding of the rack when large amount of foods weight on it.

The **Flat Oven Half Rack** has a removable insert that can provide extra space for larger food items. The right half rack portion may still be used for other food items like a casserole dish (See Figure 3 & 4). To remove the insert, squeeze on the left front insert side (See Figure 5) of the rack and tilt out clockwise. To reinstall, insert rear hooks at back of insert (See figure 6) and lay insert down. Make sure both insert front hooks snap into rack (See figure 6).

The **Offset Oven Rack** is used to maximize cooking space (See Figure 4). The offset rack can be used in the lower rack position to roast large cuts of meat and poultry.

**Do not use** cookware that extends beyond the edge of the Flat Half Rack. For best results, allow 2 inches between the pan placed on the rack and oven side or rear walls.

Figure 5

Figure 6

## BEFORE SETTING OVEN CONTROLS

### The Effortless™ oven rack system

Some models are equipped with a special oven rack system that automatically partially extends the oven rack from the interior oven glides to assist in easier access to your food items. This feature works whenever the oven door is opened or closed.

#### To assemble the Effortless™ Oven Rack system:

1. Locate all required parts. You will need the supplied oven rack (Effortless™ Oven Rack is a flat rack with a special dark coating on the left and right rack sides) and the 2 supplied chrome connector arms.
2. Open the oven door. Be sure the oven is completely cool before proceeding.
3. Place the oven rack in positions 1, 2 or 3 only (see previous page to verify positions). Be sure the rack connector brackets are at the rear of the range and pointing towards oven bottom (See Figure 2).
4. Assemble one connector arm at a time. With the oven door open and the oven rack in place, install one end of the connector arm to the hole in the door connector bracket (Figure 1) and the other end in the hole in the rack connector bracket (Figure 2 and as in Figure 3). The oven rack may need to be adjusted in or out in the rack position to match the length of the connector arm.
5. While holding the connector arm in place, twist the connector arm so the ends of the connector arm point upwards (See Figures 4 & 5). The connector arm should now be locked into position.
6. Repeat steps 4 and 5 for the other connector arm.
7. Once both connector arms are properly in place, be sure to test the oven rack operation by gently closing the oven door. The oven rack should move in and out of the oven freely when the door is opened or closed.

Figure 3 - Assembly of the Effortless™ oven rack

Figure 6 - Effortless™ oven rack after assembly

### CAUTION

**REMOVE ALL OVEN RACKS and parts before starting a self-clean cycle.** If the oven racks are left in the oven during the self-clean cycle, the glide ability of the Effortless Oven Rack system will be damaged and will cause all oven racks to lose their shiny finish and or turn blue. Remove **ALL** oven racks and clean according to instructions provided in the Care & Cleaning section of this manual.

Make sure the oven and oven racks are **COMPLETELY** cooled and safe to touch before attempting to assemble or disassemble the Effortless™ Oven Rack system.

**Never pick up hot oven rack parts.**

# SETTING OVEN CONTROLS

## CONTROL PAD FEATURES

**READ THE INSTRUCTIONS CAREFULLY BEFORE USING THE OVEN.** For satisfactory use of your oven, become familiar with the various features and functions of the oven as described below. **Detailed instructions for each feature and function follow later in this Use & Care Guide.**

- 1 Delay start pad**—Use to program a Delayed Timed Bake or Delay Self-Cleaning cycle start time.
- 2 Bake time pad**—Use to enter the length of the baking time.
- 3 Set clock pad**—Use to set the time of day.
- 4 Timer on-off pad**—Use to set or cancel the Timer. The Timer does not start or stop cooking.
- 5 My favorite pad**—Use to record a temperature setting for a cooking feature.
- 6 Oven light pad**—Use to turn the oven light ON and OFF.
- 7 Lockout pad**—Use to lock the oven door and the control panel pads.
- 8 Bake pad**—Use to select the bake cooking feature.
- 9 Broil pad**—Use to select the broil cooking feature.
- 10 Convection pad**—Use to select between the Convection Bake, Convection Roast and Convection Broil cooking features.
- 11 Quick preheat or power plus preheat pad**—Use to quickly raise oven to cooking temperature.
- 12 Keep warm pad**—Use to keep the dishes and food warm until served.
- 13 Pizza pad**—Use to select the pizza cooking feature.
- 14 Chicken nuggets pad**—Use to select the chicken nuggets cooking feature.
- 15 Self-Clean pad**—Use to select the self cleaning feature.
- 16 Convection convert pad**—Use to convert a regular recipe temperature to a convection temperature.
- 17 Add a minute pad**—Use to add a minute to the timer feature.
- 18 Numeric pad**—Use to enter temperatures and times.
- 19 Start pad**—Use to start all oven features (not used with Oven Light).
- 20 Cancel pad**—Use to cancel any oven feature previously entered except the time of day and minute timer.

## IMPORTANT THINGS TO KNOW BEFORE SETTING ANY OVEN COOKING FEATURE

This appliance has been factory pre-set to start any **BAKE, CONVECTION BAKE, CONVECTION ROAST** or **PREHEAT** feature with the oven set temperature automatically set for 350°F. The **BROIL** or **CONVECTION BROIL** features are pre-set at 550°F. However if desired, the oven set temperature may be adjusted at any time during the cooking process. You may also choose to add a **BAKE TIME** or **DELAY START** with most of the functions listed above, unless specified in their corresponding section.

## TEMPERATURE VISUAL DISPLAY

Your oven is equipped with a temperature visual display. When a cooking mode is set, the actual temperature will be shown in the display and will rise as the unit preheat. When the unit has reached its target temperature, a chime will sound to remind you to place the food in the oven. This feature will be active with some cooking modes; **BAKE, CONVECTION BAKE, CONVECTION ROAST** and **PIZZA**.

### NOTE

The lowest temperature that can be displayed is 100°F.

# SETTING OVEN CONTROLS

## MINIMUM AND MAXIMUM CONTROL PAD SETTINGS

All of the features listed below have minimum and maximum time or temperature settings that may be entered into the control. An ENTRY acceptance beep will sound each time a control pad is touched (the acceptance beep on the Oven Lockout pad is delayed 3 seconds).

An ENTRY ERROR tone (3 short beeps) will sound if the entry of the temperature or time is below the minimum or above the maximum settings for the feature.

FEATURE		MINIMUM TEMP. /TIME	MAXIMUM TEMP. /TIME
PREHEAT		170°F/77°C	550°F/288°C
BAKE		170°F/77°C	550°F/288°C
BROIL		400°F/205°C	550°F/288°C
CONVECTION BAKE		170°F/77°C	550°F/288°C
CONVECTION ROAST		170°F/77°C	550°F/288°C
CONVECTION BROIL		400°F/205°C	550°F/288°C
PIZZA		170°F/77°C	550°F/288°C
CHICKEN NUGGETS		170°F/77°C	550°F/288°C
TIMER	12 Hr. Mode	0:01 Min.	11:59 Hr./Min.
	24 Hr. Mode	0:01 Min.	11:59 Hr./Min.
CLOCK TIME	12 Hr. Mode	1:00 Hr./Min.	12:59 Hr./Min.
	24 Hr. Mode	0:00 Hr./Min.	23:59 Hr./Min.
DELAY START	12 Hr. Mode	1:00 Hr./Min.	12:59 Hr./Min.
	24 Hr. Mode	0:00 Hr./Min.	23:59 Hr./Min.
BAKE TIME	12 Hr. Mode	0:01 Min.	5:59 Hr./Min.
	24 Hr. Mode	0:01 Min.	5:59 Hr./Min.
SELF CLEAN TIME		2 hours	4 hours

## SETTING THE CLOCK

The **SET CLOCK** pad is used to set the clock. The clock may be set for 12 or 24 hour time of day operation. The clock has been preset at the factory for the 12 hour operation. When the range is first plugged in, or when the power supply to the range has been interrupted, the timer in the display will flash.

**To set the clock** (example below for 1:30)

1. Press **SET CLOCK**. "CLO" will appear in the display.
2. Press **1 3 0** pads to set the time of day to 1:30. "CLO" will stay in the display.
3. Press **START**. "CLO" will disappear and the clock will start.

## CHANGING BETWEEN 12 OR 24 HOUR TIME OF DAY DISPLAY

1. Press and hold **SET CLOCK** for 6 seconds. "CLO" will appear in the display.
2. **CONTINUE** holding the pad until "12Hr dAY" or "24Hr dAY" appears in the display and the control beeps once.
3. Press **SELF CLEAN** to switch between the 12 and 24 hour time of day display. The display will show either "12Hr dAY" or "24Hr dAY".
4. Press **START** to accept the change or press **CANCEL** to reject the change.
5. Reset the correct time as described in **To set the Clock** above. Please note that if the 24 hour time of day mode was chosen, the clock will now display time from 0:00 through 23:59 hours.

### SETTING CONTINUOUS BAKE OR 6 HOUR ENERGY SAVING

The **TIMER** and **SELF CLEAN** pads control the Continuous Bake or 6 Hour Energy Saving features. The oven control has a factory preset built-in 6 Hour Energy Saving feature that will shut off the oven if the oven control is left on for more than 6 hours. The oven can be programmed to override this feature for Continuous Baking.

#### To set the control for Continuous Bake or 6 Hour Energy Saving features

1. Press and hold **TIMER** for 6 seconds. After 6 seconds "**6Hr OFF**" or "**StAY On**" will appear in the display and the control will beep once.
2. Press **SELF CLEAN** to switch between the 6 Hour Energy Saving and continuous bake features.

Note: "**6Hr OFF**" in the display indicates the control is set for the 6 Hour Energy Saving mode and "**StAY On**" indicates the control is set for the Continuous Bake feature.

3. Press **START** to accept the change (display will return to time of day) or press **CANCEL** to reject the change.

### SETTING TEMPERATURE DISPLAY — FAHRENHEIT OR CELSIUS:

The **BROIL** and **SELF CLEAN** pads control the Fahrenheit or Celsius temperature display modes. The oven control can be programmed to display temperatures in Fahrenheit or Celsius. The oven has been preset at the factory to display in Fahrenheit.

#### To change display from Fahrenheit to Celsius or Celsius to Fahrenheit

1. To tell if the display is set for Fahrenheit or Celsius press **BROIL** and hold it for 6 seconds; "**550°**" will appear and "**BROIL**" will flash in the display and a beep will sound. If "**FAhrnht**" appears, the display is set to show temperatures in Fahrenheit. If "**CELSIUS**" appears, the display is set to show temperatures in Celsius.
2. Press **SELF CLEAN** to switch between Fahrenheit or Celsius display modes. The display will show either "**FAhrnht**" or "**CELSIUS**".
3. Press **START** to accept the change or press **CANCEL** to reject the change.

### SETTING SILENT CONTROL OPERATION

The **DELAY START** and **SELF CLEAN** pads control the Silent Control operation feature. The Silent Control operation feature allows the oven control to be operated without sounds or beeps whenever necessary. If desired the control can be programmed for silent operation and later returned to operating with all the normal sounds and beeps.

#### To change control from normal sound operation to silent control operation

1. To tell if your range is set for normal or silent operation press and hold **DELAY START**. "-- --" will appear and "**DELAY**" will flash in the display. After 6 seconds "**bEEP On**" or "**bEEP OFF**" will appear in the display.
2. Press **SELF CLEAN** to switch between normal sound operation and silent operation mode. The display will show either "**bEEP On**" or "**bEEP OFF**".

Note: If "**bEEP On**" appears, the control will operate with normal sounds and beeps. If "**bEEP OFF**" appears, the control is in the silent operation mode.

3. Press **START** to accept the change or press **CANCEL** to reject the change.

**Note:** The control will always beep at the end of a minute timer and will beep when a set temperature has been reached, even if the control is set to silent operation.

## SETTING OVEN CONTROLS

### SETTING MINUTE TIMER

The **TIMER ON-OFF** pad controls the Minute Timer feature. The Minute Timer serves as an extra timer in the kitchen that will beep when the set time has run out. It does not start or stop cooking. The Minute Timer feature can be used during any of the other oven control functions. Refer to "Minimum and Maximum Control Pad Settings" for time amount settings.

**To set the Minute Timer** (example for 5 minutes)

1. Press **TIMER ON-OFF**. "-- --" will appear and **"Timer"** will flash in the display.
2. Press the number pads to set the desired time in the display.
3. Press **START**. The time will begin to count down with **"5:00"** and **"Timer"** will stay in the display.

Note: If **START** is not pressed the timer will return to the time of day after 25 seconds.

4. When the set time has run out, **"End"** and **"Timer"** will show in the display. The clock will sound with 3 beeps every 5 seconds until **TIMER ON-OFF** is pressed.

**To cancel the Minute Timer before the set time has run out**

1. Press **TIMER ON-OFF**. The display will return to the time of day.

### SETTING ADD 1 MINUTE FEATURE

The **ADD 1 MINUTE** pad is used to set the Add 1 Minute feature. When the **ADD 1 MINUTE** pad is pressed, 1 minute is added to the Minute Timer feature if this feature is already active. If the Minute Timer feature is not active and the **ADD 1 MINUTE** pad is pressed, the Minute Timer feature will become active and will begin counting down from 1 minute.

### SETTING LOCKOUT FEATURE

The  pad controls the Lockout feature. The Lockout feature automatically locks the cooktop controls, the oven door and prevents the oven from being turned on. It does not disable the clock, Minute Timer or the interior oven lights.

**To activate the Oven Lockout feature**

1. Press and hold  for 3 seconds.
2. After 3 seconds **"door Loc"** will appear in the oven control display, a beep will sound and **"DOOR"** and  will flash in the display. Once the oven door is locked the **"DOOR"** and  indicators will stop flashing and remain on along with the **"Loc"**.

**To reactivate normal oven operation:**

1. Press and hold  for 3 seconds. After 3 seconds **"door OPn"** will appear and a beep will sound. The **"DOOR"** and  will flash in the display until the oven door has completely unlocked
2. The oven is again fully operational.

#### NOTE

During lockout feature surface elements can not be used (see ESEC Lockout Feature)

## SETTING OVEN CONTROLS

### SETTING POWERPLUS™ PREHEAT

The **PREHEAT** pad controls the PowerPlus™ Preheat feature. The Preheat feature will bring the oven up to temperature and then indicate when to place the food in the oven. Use this feature when recipes call for preheating. Preheating is not necessary when roasting or cooking casseroles. The oven can be programmed to preheat at any temperature between 170°F to 550°F.

#### To set the Preheat temperature for 375°F

1. Arrange the interior oven racks.
2. Press **PREHEAT**. "350" will appear in the display. If a preheat of 350°F is needed, press **START**.
3. Press **3 7 5**.
4. Press **START**. "PRE" will be displayed while the oven is preheating.
5. Press **CANCEL** when baking is complete or to cancel the preheat feature.

#### NOTE

After the oven has reached the desired temperature (this example, 375°F) the control will beep and the "PRE" light will turn off, the BAKE feature will activate and oven target temperature will be displayed. If you missed hearing the beep, you can tell that the oven has reached preheat temperature if you see the oven temperature showing in the oven display. Once the oven has preheated, **place food in the oven**. The preheat temperature can only be changed while the "PRE" message is displayed.

#### To change Preheat temperature while oven is preheating (ex: changing from 375°F to 425°F)

If it is necessary to change the preheat temperature while the oven is preheating to the original temperature:

1. While preheating, press **PREHEAT**. "375" will appear in the display.
2. Enter the new preheat temperature. Press **4 2 5**.
3. Press **START**. "PRE" will be shown in the display.

Note: A beep will sound once the oven temperature reaches 425°F and the display will show "425°".

4. When baking is complete press **CANCEL**.

#### NOTE

While in preheat mode, the convection fan will be activated during the first rise of temperature to allow the oven to reach its target temperature faster. The Bake, Broil and Convection elements will also cycle for a better heat distribution.

### SETTING BAKE

The **BAKE** pad controls normal baking. If a rapid preheating is preferred, refer to the **POWERPLUS™ PREHEAT** feature for instructions. The oven can be programmed to bake at any temperature from 170°F to 550°F.

#### Baking Tips:

- Preheat your oven before using the bake mode.
- During preheat, the 3 elements and the convection fan are used in cycle to quickly heat the oven.
- Use only one rack and center the pans as much as possible on rack 2 or 3.
- If using two racks, place the oven racks in positions 2 and 4.
- Allow 2" to 4" (5,1 to 10,2cm) around the utensil(s) for proper air circulation.
- Be sure the pans do not touch each other, the door, sides or back of the oven.

#### To set the Bake Temperature to 375°F

1. Arrange interior oven racks.
2. Press **BAKE**, "350" will appear in the display. If a bake of 350°F is needed, press **START**.
3. Press **3 7 5**.
4. Press **START**. The actual temperature will be displayed. A beep will sound once the oven temperature reaches 375°F and the display will show "375°".
5. Place food in the oven.

#### NOTE

Pressing **CANCEL** will stop the feature at any time.

#### To change the Bake Temperature (example: changing from 375°F to 425°F)

1. After the oven has already been set to bake at 375°F and the oven temperature needs to be changed to 425°F, press **BAKE** and "375" will appear in the display.
2. Press **4 2 5**.
3. Press **START**.

#### NOTE

During the first rise of temperature, the convection fan will be activated to allow the oven to reach its target temperature faster. The Bake, Broil and Convection elements will also cycle for a better heat distribution.

## SETTING OVEN CONTROLS

### SETTING CONVECTION BAKE

This mode of cooking enables you to obtain the best culinary results when baking with multiple pans and racks. Multiple rack baking may slightly increase cook time for some foods but the overall result is time saved. Some food may cook faster and more evenly with Convection Bake. Convection baking uses the three elements and a fan to circulate the oven's heat evenly and continuously within the oven. The oven can be programmed for Convection baking at any temperature between 170°F to 550°F with a default temperature of 350°F.

#### Convection Baking Tips:

- Always preheat your oven before using the Convection Bake mode.
- During preheat, the 3 elements and the convection fan are used in cycle to quickly heat the oven.
- If your recipe cooking temperature has already been converted for convection baking there is no need to reduce your oven temperature. If your recipe has not had the temperature converted for convection baking you can easily reduce using the Convection Convert feature. Please see Convection Convert section on next page for further instruction on temperature conversion.
- Use tested recipes with times adjusted for convection baking when using this mode. Time reductions will vary depending on the amount and type of food to be cooked.
- When using Convection Bake with a single rack, place oven rack in position 2 or 3. If cooking on multiple racks, place the oven racks in positions 2 and 4; 1, 3 (offset rack) and 4 or 2, 3 and 4 if there is no offset rack supplied
- Most bakeries (except cakes) should be baked on pans with no sides or very low sides to allow heated air to circulate around the food.
- Food baked on pans with a dark finish will cook faster.

**Air circulation during Convection Bake**  
Figure 1

**Oven Rack Positions**  
Figure 2

#### To set the oven for Convection Bake and temperature to 375°F

1. Arrange interior oven racks.
2. Press **CONVECT**. "**CONVECT**" and "**BAKE**" will flash and "**350**" will appear in the display. If a Convection Bake of 350°F is needed, press **START**.
3. Press **375**. "**CONVECT**" and "**BAKE**" will keep flashing and "**375°**" will appear in the display.
4. Press **START**. The actual oven temperature and the fan icon will be displayed. A beep will sound once the oven temperature reaches 375°F and the display will show "**375°**", "**CONVECT**", "**BAKE**" and the fan icon.
5. Place food in the oven.

#### **NOTE**

Pressing **CANCEL** will stop the feature at any time.

#### **Benefits of Convection Bake:**

- Multiple rack baking.
- Some foods cook faster, saving time and energy.
- No special pans or bakeware needed.

#### **NOTE**

The convection fan will start **AS SOON AS** the oven is set for Convection Bake. The display will show an icon of rotating fan within a square. This rotating fan icon indicates when the Convection Fan is operating. The Bake, Broil and Convection elements will also cycle for a better heat distribution.

## SETTING CONVECTION CONVERT

The Convection Convert pad is used to automatically convert a standard baking recipe for convection baking. When set properly, this feature is designed to display the actual converted (reduced) temperature in the display. Convection Convert may ONLY be used with a Convection Bake cooking mode. It can be used with the features Delay Start and Bake Time (see their sections for directions). If convection conversion is used with the Bake Time and Delay Start features, "CF" (check food) will be displayed when 75% of the bake time complete. At this time the oven control will sound 3 long beeps at regular intervals until baking had finished. When the bake time has completely finished the control will display "End" and beep at regular interval until the **CANCEL** pad is pressed.

### NOTE

To use this feature with the **BAKE TIME** option, the **BAKE TIME** pad must be pressed before the **CONVECTION CONVERT** pad.

### To set the oven for Convection Bake with a standard baking recipe temperature of 400°F:

1. Arrange interior oven racks.
2. Press **CONVECT**. "CONVECT" and "BAKE" will flash and "350" will appear in the display.
3. Press **400**. "CONVECT" and "BAKE" will keep flashing and "400°" will appear in the display.
4. Press **CONVECTION CONVERT**. As soon as the convection convert pad is pressed, the oven will start heating. The temperature displayed will be 25°F lower than what it used to be. The actual oven temperature and the fan icon will be displayed. A beep will sound once the oven temperature reaches 375°F and the display will show "375°", "CONVECT", "BAKE" and the fan icon.
5. Place food in the oven.

### NOTE

When using a Bake Time under 20 minutes, the Convection Convert will not beep and display the "CF" message.

## SETTING CONVECTION ROAST

This mode is best for cooking tender cuts of beef, lamb, park and poultry. Use this mode when cooking speed is desired. The Convection Roasting gently browns the exterior and seals in the juices. Convection roasting uses the hidden bake element, the hidden convection element, the broil element and a fan to circulate the oven's heat evenly and continuously within the oven. The oven can be programmed for Convection Roasting at any temperature between 170°F to 550°F with a default temperature of 350°F.

### Convection Roasting Tips:

- Use a broiler pan and grid, and a roasting rack (available by mail order). The broiler pan will catch grease spills and the grid will help prevent spatters. The roasting rack will hold the meat.
- Place an oven rack on rack position 1 (offset rack, if available).
- No preheat is needed in convection roast.
- Make sure the roasting rack is securely seated on the grid in the broiler pan. The roasting rack fits on the grid allowing the heated air to circulate under the food for even cooking and helps to increase browning on the underside (available by mail order only).
- There is no need to reduce the convection temperature or to use the Convection Convert feature with this cooking mode.
- **DO NOT** use the broiler pan without the grid or cover the grid with aluminum foil (available by mail order).
- Always pull the rack out to the stop position before removing food.
- Position food (fat side up) on the roasting rack.

### To set a Convection Roast Temperature of 375°F:

1. Arrange oven racks and place food in the oven.
2. Press **CONVECT**; "350" will be displayed; "CONVECT" and "BAKE" will flash.
3. Press **CONVECT** again; "350" will be displayed; "CONVECT" and "ROAST" will flash.
4. Enter the desired roasting temperature using the number pads **3 7 5**.
5. Press **START**; The actual oven temperature will be displayed, "CONVECT", "ROAST" and the fan icon will be displayed. The Bake, Broil and Convection elements will also cycle for a better heat distribution.

### NOTE

Pressing **CANCEL** will stop the feature at any time.

### NOTE

The Bake, Broil and Convection elements will cycle for a better heat distribution.

# SETTING OVEN CONTROLS

## SETTING CONVECTION BROIL

Use this mode for thicker cuts of meat, fish and poultry. The Convection Broiling gently browns the exterior and seals in the juices. Convection broiling uses the broil element and a fan to circulate the oven's heat evenly and continuously within the oven. The oven can be programmed for Convection Broiling at any temperature between 400°F to 550°F with a default temperature of 550°F.

### Convection Broiling Tips:

- For optimum browning, preheat the broil element for 5 minutes.
- Broil one side until the food is browned; turn and cook on the second side. Season and serve.
- Always pull the rack out to the "stop" position before turning or removing food.
- Always use a broiler pan and its grid when broiling (available by mail order). It allows the dripping grease to be kept away from the high heat of the broil element.
- **DO NOT** use the broil pan without the insert (available by mail order). **DO NOT cover the broil pan insert with foil.** The exposed grease could catch fire.
- If using a Searing Grill (available by mail order), preheat the grill for 5 to 10 minutes before placing your meat.
- Convection broiling is generally faster than conventional broiling. Check for doneness at the minimum recommended time.

### ! WARNING

Should an oven fire occur, leave the oven door closed and turn off the oven. If the fire continues, throw baking soda on the fire or use a fire extinguisher. **DO NOT** put water or flour on the fire. Flour may be explosive and water can cause a grease fire to spread and cause personal injury.

### To set a Convection Broil Temperature of 500°F:

1. Arrange oven racks.
2. Press **CONVECT**; "350" will be displayed; "CONVECT" and "BAKE" will flash.
3. Press **CONVECT** again; "350" will be displayed; "CONVECT" and "ROAST" will flash.
4. Press **CONVECT** again; "550" will be displayed; "CONVECT" and "BROIL" will flash.
5. Enter the desired roasting temperature using the number pads **5 0 0**.
6. Press **START**; "500", "CONVECT", "BROIL" and the fan icon will be displayed.
7. After **5** minutes of preheat, place food in the oven.

### ! NOTE

Pressing **CANCEL** will stop the feature at any time.

Accessories available via the enclosed brochure:

### ! CAUTION

Always use this cooking mode with the oven door **closed** or the convection fan will not turn on.

## Electric Oven Convection Broiling Table Recommendations

Food Item	Rack Position	Temperature Setting	Cook Time		Doneness
			1st side	2nd side	
Steak 1" thick	4th	550° F	6:00	4:00	Rare
	4th	550° F	7:00	5:00	Medium
Pork Chops 3/4" thick	4th	550° F	8:00	6:00	Well
Chicken - Bone In	3rd	450° F	20:00	10:00	Well
Chicken - Boneless	4th	450° F	8:00	6:00	Well
Fish	3rd	500° F	13:00	-	Well
Shrimp	3rd	550° F	5:00	-	Well
Hamburger 1" thick	4th	550° F	9:00	7:00	Medium
	4th	550° F	10:00	8:00	Well

## SETTING OVEN CONTROLS

### SETTING BAKE TIME

Bake Time allows the oven to be set to cook for a specific length of time and shut off automatically.

The oven will shut off and will beep when the countdown is finished. This feature can be used with Bake, Convection Bake, Convection Roast, Pizza and Chicken Nuggets cooking modes.

**To program the oven to begin baking immediately and to shut off automatically (example: BAKE at 350°F for 30 minutes):**

1. Be sure the clock is set for the correct time of day.
2. Arrange interior oven rack(s) and place the food in the oven.
3. Press **BAKE**, "350" will appear in the display.
4. Press **START**. The actual oven temperature will appear in the display.
5. Press **BAKE TIME**. "-- --" will appear in the display.
6. Enter the desired baking time by pressing **3 0**.
7. Press **START**. Once the Timed Bake feature has started, the current time of day will appear in the display.

#### NOTE

Baking time can be set for any amount of time between 1 minute to 6 hours. The time remaining can be shown in the timer section of the display by pressing **BAKE TIME** at any moment of the cooking.

Press **CANCEL** when baking has finished or at any time to cancel the Timed Bake feature. A Bake Time of "0" minute can also be entered to cancel the Bake Time feature and keep the oven in its current cooking mode.

#### NOTE

After the Timed Bake feature has activated, press **BAKE TIME** to display the bake time remaining in the Bake Time mode. Once Bake Time has started baking, a beep will sound when the oven temperature reaches the set temperature.

#### When the timed bake finishes:

1. "End" and the time of day will show in display. The oven will shut off automatically.
2. The control will beep 3 times. The control will continue to beep 3 times every 30 seconds until **CANCEL** is pressed.

#### CAUTION

Use caution with the **DELAY START** features. Use the automatic timer when cooking cured or frozen meats and most fruits and vegetables. Foods that can easily spoil such as milk, eggs, fish, meat or poultry, should be chilled in the refrigerator first. Even when chilled, they should not stand in the oven for more than 1 hour before cooking begins, and should be removed promptly when cooking is completed. Eating spoiled food can result in sickness from food poisoning.

### SETTING DELAY START

The **BAKE**, **CONVECTION BAKE**, **BAKETIME** and **DELAY START** pads control the Delayed Time Bake feature. The automatic timer of the Delayed Time Bake will turn the oven **on and off** at the time you select in advance.

#### NOTE

If your clock is set for normal 12 hour display mode the Delayed Timed Bake or Delayed Timed Convection Bake cycle can never be set to start more than 12 hours in advance. To set for Delayed Timed Bake or Delayed Timed Convection Bake 12-24 hours in advance set the control for the 24 hour time of day display mode.

**To program the oven for a delayed BAKE start time (example: baking at 375°F, starting at 5:30):**

1. Be sure that the clock is set with the correct time of day.
2. Arrange interior oven rack and place the food in the oven.
3. Press **BAKE**. "350" will appear in the display.
4. Enter the desired temperature; pressing **3 7 5**.
5. Press **START**. The actual oven temperature will appear in the display.
6. Press **DELAY START**.
7. Enter the desired start time; pressing **5 3 0**.
8. Press **START**. When Delayed Time Bake starts, the set oven temperature will appear, "DELAY", "BAKE" and the current time of day will appear in the display.

#### NOTE

If it is desired to have the oven shut off automatically after a set time; enter a **BAKE TIME** at this step.

7. When the desired start time is reached, the actual oven temperature appears in display and "DELAY" disappears. Oven starts to bake at the previously selected temperature.

Press **CANCEL** when baking has completed or at any time to cancel the Delayed Time Bake feature.

## SETTING OVEN CONTROLS

### SETTING KEEP WARM

This mode is best for keeping oven baked foods warm for serving after cooking has finished. The **KEEP WARM** pad turns ON the Keep Warm feature and will maintain an oven temperature of 170°F (77°C). The Keep Warm feature will keep oven baked foods warm for serving up to 3 hours after cooking has finished. **After 3 hours the Keep Warm feature will shut the oven OFF.** The Keep Warm feature may be used without any other cooking operations or can be set to turn ON automatically after a **BAKE TIME** or **DELAYED BAKE TIME**.

#### Keep Warm Tips:

- Always start with hot food.
- Do not use the Keep Warm feature to heat cold food.
- Food in heat-safe glass and glass ceramic containers may need higher temperature settings compared to food in regular containers.
- Avoid repeated openings of the oven, it will allow hot air to escape and the food to cool.
- Aluminum foil may be used to cover food to increase moisture content.

#### To set Keep Warm:

1. Arrange interior oven racks and place food in oven.
2. Press **KEEP WARM**. "Hld" will appear in the display. Note: If no pad is touched within 25 seconds the request to turn ON Keep Warm feature will be cancelled.
3. Press **START**. The oven icon will appear in the display.
4. To turn OFF the KEEP WARM at any time press **CANCEL**.

#### To set Keep Warm to turn ON automatically:

1. Arrange interior oven racks and place food in oven. Set the oven properly for **Bake Time or Delayed Bake Time**. (See their respective sections for more details).
2. Press **KEEP WARM**. Note: If no pad is touched within 25 seconds, the request to turn ON Keep Warm feature will be cleared.
3. Press **START**. "Hld" will disappear and the temperature will be displayed. The Keep Warm mode is set to turn ON automatically after Timed Bake has finished.
4. To turn the Keep Warm feature OFF at any time press **CANCEL**.

### SETTING PIZZA

The **PIZZA** pad has been designed to give optimum cooking performance when cooking your favorite pizza. The Pizza pad let you choose a preset between a frozen pizza (425°F) and a fresh pizza (400°F). If needed, a different target temperature than the presets can be entered. Some fresh pizza request using a broil feature for a few minutes, but this is not part of the Pizza pad presets.

#### Pizza Tips:

- Follow the instructions on the box for preheating and baking times.
- For optimum cooking results, only bake one pizza at once on rack position 2.
- Check the pizza at 75% of the maximum cook time listed on the package.

#### To set Pizza for a frozen pizza:

1. Arrange interior oven racks.
2. Press **PIZZA** pad. "Fro" will appear in the display. If a different temperature than 425°F is needed, enter the temperature now, using the keypad digits.
3. Press **START**. The fan icon and the actual oven temperature will appear in the display.
4. Place the pizza in the oven when the beep is heard.
5. If needed, enter a **BAKE TIME** (see its section for further details).
6. To turn OFF the Pizza feature at any time press **CANCEL**.

#### To set Pizza for a fresh pizza:

1. Arrange interior oven racks.
2. Press **PIZZA** pad **twice**. "Frh" will appear in the display. If a different temperature than 400°F is needed, enter the temperature now, using the keypad digits.
3. Press **START**. The fan icon and the actual oven temperature will appear in the display.
4. Place the pizza in the oven when the beep is heard.
5. If needed, enter a **BAKE TIME** (see its section for further details).
6. To turn OFF the Pizza feature at any time press **CANCEL**.

#### NOTE

Pressing **CANCEL** will stop the feature at any time.

## SETTING OVEN CONTROLS

### SETTING CHICKEN NUGGETS

The **CHICKEN NUGGETS** pad has been designed to give optimum cooking performance when cooking your favorite chicken nuggets. The Chicken Nuggets pad is preset for a Convection Bake at (400°F) with a Bake Time of 18 minutes, ending with a Keep Warm setting. If needed, a different target temperature or Bake Time than the presets can be entered.

#### Chicken Nuggets Tips:

- For most type of chicken nuggets, preheating is not required and the preset baking time of the feature will give you optimum results.
- For larger chicken tenders, follow the preheating and baking instructions on the box and only use a single rack.
- For a single rack, use rack position 2.
- For multiple racks, use rack positions 2 and 4.

#### To set Chicken Nuggets:

1. Arrange interior oven racks and place food in oven.
2. Press **CHICKEN NUGGETS** pad. "CHI" will appear in the display. If a different temperature than 400°F is needed, enter the temperature now, using the keypad digits. If a different Bake Time than 18 minutes is required, press **BAKE TIME** and enter the desired time (or 0 for an untimed baking).
3. Press **START**. The fan icon will appear in the display.
4. To turn OFF the Chicken Nuggets feature at any time press **CANCEL**.

#### NOTE

The Chicken Nuggets feature is automatically programmed to activate the Keep Warm feature when the cooking is finished. "HLD" will be displayed for a maximum of 3 hours. See the Keep Warm feature for more information.

### SETTING MY FAVORITE

The My Favorite setting allow you to save your most frequently used or most complex cooking sequence. This feature will save the cooking mode, the target temperature and the bake time (if any). The oven can recall a cooking sequences from its internal memory, which is easily accessible from a one touch button. This function can be used with Bake, Convection Bake, Convection Roast and Preheat.

**To save a Favorite** (example is a 450°F Bake for 30 minutes):

1. Press **BAKE**. The default temperature will appear in the display.
2. Enter temperature needed; **4 5 0**.
3. Press **START**.
4. Press **BAKE TIME**.
5. Enter time needed; **3 0**.
6. Press **START**.
7. Press and hold for 3 seconds **MY FAVORITE** pad. The ♥ icon will be shown to confirm your setting has been saved.

#### To recall a Favorite:

1. Press **MY FAVORITE** pad.
2. Press **START**.

#### NOTE

Recalling a Favorite can only be done when the oven is not currently in operation.

#### To overwrite a Favorite:

1. To overwrite My Favorite simply start a new cooking sequence and save it as shown in example above. The new My Favorite settings will overwrite the old ones.

#### To delete a Favorite:

1. Press the **MY FAVORITE** pad to delete for **3 seconds** while the oven is not in operation and no cooking mode has been set. The ♥ icon will disappear.

# SETTING OVEN CONTROLS

## SETTING BROIL

This mode is best for meats, fish and poultry up to 1" thick. Broiling is a method of cooking tender cuts of meat by direct heat under the broil element of the oven. The high heat cooks quickly and gives a rich, brown outer appearance. The **BROIL** pad controls the Broil feature. An optional Searing Grill, Broiler Pan and Insert are available via the enclosed accessories brochure (Figure 2 & 3). The optional broil pan and broil pan insert used together allow dripping grease to drain and be kept away from the high heat of the oven broiler. The oven can be programmed to broil at any temperature from 400°F to 550°F with a default temperature of 550°F.

### Broiling Tips:

- For optimum browning, preheat the broil element for 5 minutes.
- Broil one side until the food is browned; turn and cook on the second side. Season and serve.
- Always pull the rack out to the "stop" position before turning or removing food.
- Always use the broiler pan and its cover when broiling. It allows the dripping grease to be kept away from the high heat of the broil element (see Figure 2).
- For best broiling results, broil with the oven door in the broil stop position (see Figure 1).
- If using a Searing Grill (available by mail order), preheat the grill for 5 to 10 minutes before placing your meat.
- **DO NOT** use the broil pan without the insert. **DO NOT cover the broil pan insert with foil.** The exposed grease could catch fire.

Accessories available via the enclosed brochure:

### To set a Broil of 500°F:

1. Place the broiler pan insert on the broiler pan. Then place the food on the broiler pan insert. **DO NOT** use the broiler pan without the insert. **DO NOT** cover the broiler insert with foil. The exposed grease could ignite.
2. Arrange the interior oven rack.
3. Press **BROIL**. "550" will appear in the display.
4. Press **5 0 0**. If a lower broil temperature is desired (minimum broil temperature setting is 400°F), press the desired temperature before continuing to step 5.
5. Press **START**. The oven will begin to broil. "500°" will appear in the display.
6. Preheat for 5 minutes before broiling.
7. Place the broiler pan on the rack. Be sure to center the broiler pan directly under the broiler element. **Make sure the oven door is in the broil stop position (See Figure 1).**
8. Broil on one side until food is browned; turn and cook on the second side. Season and serve. **Note:** Always pull the rack out to the stop position before turning or removing food.
9. To stop broiling press **CANCEL**.

### NOTE

To assure your electronic controls safety when broiling with the oven door in broil position, an high speed cooling fan will blow air through the trims above the door(s).

### WARNING

Should an oven fire occur, leave the oven door closed and turn off the oven. If the fire continues, throw baking soda on the fire or use a fire extinguisher. **DO NOT** put water or flour on the fire. Flour may be explosive and water can cause a grease fire to spread and cause personal injury.

### Electric Oven Broiling Table Recommendations

Food Item	Rack Position	Temperature Setting	Cook Time		Doneness
			1st side	2nd side	
Steak 1" thick	4th	550° F	6:00	4:00	Rare
	4th	550° F	7:00	5:00	Medium
Pork Chops 3/4" thick	4th	550° F	8:00	6:00	Well
Chicken - Bone In	3rd	450° F	20:00	10:00	Well
Chicken - Boneless	4th	450° F	8:00	6:00	Well
Fish	3rd	500° F	13:00	-	Well
Shrimp	3rd	550° F	5:00	-	Well
Hamburger 1" thick	4th	550° F	9:00	7:00	Medium
	4th	550° F	10:00	8:00	Well

## SETTING THE SABBATH FEATURE (for use on the Jewish Sabbath & Holidays)

The **BAKE TIME** and **DELAY START** pads are used to set the Sabbath feature. The Sabbath feature may only be used with the **BAKE** pad. The oven temperature may be set higher or lower after setting the Sabbath feature (the oven temperature adjustment feature should be used only during Jewish Holidays), however the display will not visibly show or provide any audible tones indicating whether the change occurred correctly. Once the oven is properly set using Bake with the Sabbath feature active, the oven will remain continuously ON until cancelled. This will override the factory preset 6-Hour Energy Saving feature.

If the oven light will be needed during the Sabbath, press **OVEN LIGHT**  before activating the Sabbath feature. Once the oven light is turned ON and the Sabbath feature is active, the oven light will remain ON until the Sabbath feature is turned OFF. If the oven light needs to be OFF, be sure to turn the oven light OFF before activating the Sabbath feature.

### To Program the Oven to Begin Baking Immediately & activate the Sabbath feature (example: baking at 350°F)

1. Be sure that the clock is set with the correct time of day.
2. Place the food in the oven.
3. Press **BAKE**. "350°" appears in the display.
4. Press **START**. The actual oven temperature appears in the display.
5. If you desire to set the oven control for a **Bake Time** or **Delayed Bake Time** do so at this time. If not, skip this step and continue to step 7. Refer to the **Bake Time / Delay Start** section for complete instructions. Remember the oven will shut down after using **Bake Time** or **Delay Start** and therefore may only be used once during the Sabbath/Jewish Holidays.
6. The oven will turn ON and begin heating.
7. Press and hold both the **BAKE TIME** and **DELAY START** pads for at least **3 seconds**. "SAb" will appear in the display. Once "SAb" appears in the display the oven control will no longer beep or display any further changes and the oven is properly set for the Sabbath feature.
8. The oven may be turned OFF at any time by first pressing **CANCEL** pad (this will turn the oven OFF only). To turn OFF the Sabbath feature press and hold both the **BAKE TIME** and **DELAY START** pads for at least **3 seconds**. "SAb" will disappear from the display.

## IMPORTANT

It is not advised to attempt to activate any other program feature other than **BAKE** while the Sabbath feature is active. ONLY the following key pads will function after setting the Sabbath feature; **0** to **9**, **BAKE**, **START** & **CANCEL**. All other keypads should not be used once the Sabbath feature is properly activated.

## NOTE

You may change the oven temperature once baking has started by pressing **BAKE**, the numeric key pads for the temperature you want (example for 425°C press **4 2 5**) and then pressing **START twice** (for Jewish Holidays only). Remember that **the oven control will no longer beep or display any further changes** once the oven is set for the Sabbath feature.

Should you experience a power failure or interruption, the oven will shut off. When power is returned, "SF" (Sabbath Failure) will be shown in the oven display and the cooktop displays (models B & C). The oven and cooktop will not turn back on automatically. If your food was nearly fully cooked, you may allow the trapped heat in the oven to finish the cooking process. Otherwise, you should remove the food when the power failure occurs, because you may only start the oven once during the Sabbath/Jewish Holidays. After the Sabbath observance, turn OFF the Sabbath feature and be sure that all the control knobs are at the OFF position. The appliance may be used again with all normal functions.

After the Sabbath observance turn OFF the Sabbath feature. Press and hold both the **BAKE TIME** and **DELAY** pads for at least **3 seconds**. "SAb" will disappear from the display and the oven may be used with all normal functions. For further assistance, guidelines for proper usage, and a complete list of models with the Sabbath feature, please visit the web at <http://www.star-k.org>.

### Notes for the use of the cooktop in Sabbath mode:

- No Sabbath mode is available for induction cooktops. When Sabbath mode is enabled, the cooktop will lock and it will not be possible to turn a cooking zone ON. If a cooking zone is ON when Sabbath is set, it will turn off.

## SETTING OVEN CONTROLS

### ADJUSTING OVEN TEMPERATURE

The temperature in the oven has been pre-set at the factory. When first using the oven, be sure to follow recipe times and temperatures. If you think the oven is cooking too hot or too cool for the temperature you select, you can adjust the actual oven temperature to be more or less than what is displayed. Before adjusting, test a recipe by using a temperature setting that is higher or lower than the recommended temperature. The baking results should help you to decide how much of an adjustment is needed.

#### NOTE

The oven temperature adjustments made with this feature will not change the Self-Clean cycle temperature or the Broil temperature.

#### To adjust the oven temperature higher

1. Press **BAKE** for 6 seconds. "UPO 0" will appear in the display.
2. To increase the temperature use the number pads to enter the desired change (Example 30°F) **3 0**. The temperature may be increased as much as 35°F (19°C).
3. Press **START** to accept the temperature change and the display will return to the time of day. Press **CANCEL** to reject the change if necessary.

#### To adjust the oven temperature lower

1. Press **BAKE** for 6 seconds. 0° will appear in the display.
2. To decrease the temperature use the number pads to enter the desired change (Example -30°F) **3 0** and then press **SELF CLEAN**. The temperature may be decreased as much as 35°F (19°C).
3. Press **START** to accept the temperature change and the display will return to the time of day. Press **CANCEL** to reject the change if necessary.

#### NOTE

The oven temperature adjustments are permanent and will stay forever in the unit memory unless you manually change it again. Even a power outage will not reset these changes. Follow the same procedure again if you wish to change it to a different setting.

### OVEN LIGHT

The oven is equipped with 2 oven lights. The oven lights will turn on automatically, when the oven door is opened.

The oven light may be turned on when the door is closed by using the oven light pad located on the control panel. The oven light key will toggle the lights at full intensity.

#### To toggle the Oven Lights ON and OFF:

1. Press **OVEN LIGHT** .

The interior oven lights are covered with a glass shield held by a wire holder. The glass shield must be in place whenever the oven is in use.

To change the interior oven lights, see "Changing the oven light" in the **Care & Cleaning** section.

## SETTING OVEN CONTROLS

### Self-cleaning

A self-cleaning oven cleans itself with high temperatures (well above normal cooking temperatures) which eliminate soils completely or reduces them to a fine powdered ash you can wipe away with a damp cloth.

#### ➔ IMPORTANT

##### Adhere to the following cleaning precautions:

- **DO NOT** use oven cleaners or oven protective coatings in or around any part of the oven interior.
- **DO NOT** clean the oven door gasket. The woven material of the oven door gasket is essential for a good seal. Care should be taken not to rub, damage or remove the gasket.
- **DO NOT** use any cleaning materials on the oven door gasket. Doing so could cause damage.
- **Remove the broiler pan and insert, all utensils and ANY ALUMINUM FOIL. These items cannot withstand high cleaning temperatures and will melt.**
- **Completely remove ALL OVEN RACKS and ANY ACCESSORIES. If the oven racks are not removed, they will lose their special coating properties and will no longer slide in and out of the oven cavity effortlessly.**
- **Remove any excessive spillovers** in the oven cavity **before** starting the Self-Cleaning cycle. To clean, use hot, soapy water and a cloth. Large spillovers can cause heavy smoke or fire when subjected to high temperatures. **DO NOT** allow food spills with a high sugar or acid content (such as milk, tomatoes, sauerkraut, fruit juices or pie filling) to remain on the surface as they may leave a dull spot even after cleaning.
- Clean any soil from the oven frame, the door liner outside the oven door gasket and the small area at the front center of the oven bottom. These areas heat sufficiently to burn soil on. Clean with soap and water.

### What to Expect during Cleaning

While the oven is in operation, the oven heats to temperatures much higher than those used in normal cooking. Sounds of metal expansion and contraction are normal. Odor is also normal as the food soil is being removed. Smoke may appear through the oven vent.

If heavy spillovers are not wiped up before cleaning, they may flame and cause more smoke and odor than usual. This is normal and safe and should not cause alarm. If available, use an exhaust fan during the self-cleaning cycle.

#### ⚠ CAUTION

To avoid possible burns use care when opening the oven door after the Self-Cleaning cycle. Stand to the side of the oven when opening the door to allow hot air or steam to escape.

During the Self-Cleaning cycle, the outside of the range can become very hot to the touch. **DO NOT** leave small children unattended near the appliance.

The health of some birds is extremely sensitive to the fumes given off during the Self-Cleaning cycle of any range. Move birds to another well-ventilated room.

**DO NOT** line the oven walls, racks, bottom or any other part of the range with **aluminum foil**. Doing so will destroy heat distribution, produce poor baking results and cause permanent damage to the oven interior (aluminum foil will melt to the interior surface of the oven).

**DO NOT** force the oven door open. This can damage the automatic door locking system. Use caution when opening the door after the Self-Cleaning cycle is completed. The oven may still be **VERY HOT**.

#### 📌 NOTE

See additional cleaning information for the oven door in the **General Care & Cleaning** section.

## SETTING OVEN CONTROLS

### SETTING SELF-CLEAN CYCLE TIME LENGTH

The **SELF CLEAN** pad controls the Self-Cleaning feature. If you are planning to use the oven directly after a self-clean cycle remember to allow time for the oven to cool down and the oven door to unlock. This normally takes about one hour. So a 3 hour self-clean cycle will actually take about 4 hours to complete.

\*It is recommend to use a 2 hour self-clean cycle for **light soils**, a 3 hour cycle for **average soils**, and a 4 hour cycle for **heavy soils** (to assure satisfactory results).

#### To set the controls for a 3 hour Self-Cleaning cycle to start immediately and shut off automatically

1. Be sure the clock is set with the correct time of day and the oven door is closed.
2. Press **SELF CLEAN**. "CLn" and "3:00" HR will show in the display. The control will automatically clean for a 3 hour period (default self-cleaning cycle time).

#### NOTE

If a 2 or 4 hour clean time is desired, press **SELF CLEAN** multiple times to toggle between 2, 3 or 4 hours.

3. Press **START**. "door Loc" will appear, a beep will sound and the "DOOR" and  icon will flash; the letters "CLn" will remain on in the display.
4. As soon as the control is set, the motor driven oven door lock will begin to close automatically. Once the door has been locked the "DOOR" indicator light and  icon will stop flashing and remain on. Also, the oven icon will appear in the display.

#### NOTE

Allow about 15 seconds for the oven door lock to close.

#### When the Self-Clean Cycle is Completed

1. "HOT" will appear in the display. The time of day, the "DOOR" and  icon will remain in the display.
2. Once the oven has cooled down for approximately 1 HOUR, "door OPn" will appear and the "DOOR" and  icon will flash until the door is unlocked, the oven door can then be opened and the timer will revert back to the time of the day.

#### Stopping or Interrupting a Self-Cleaning Cycle

If it becomes necessary to stop or interrupt a self-cleaning cycle due to excessive smoke or fire in the oven:

1. Press **CANCEL**.
2. The oven door can only be opened after the oven has cooled down for approximately 1 HOUR, "door OPn" will appear and the "DOOR" and  icon will flash until the door is unlocked, the oven door can then be opened and the timer will revert back to the time of the day.

The **SELF CLEAN** and **DELAY START** pads controls the Delayed Self-Clean operation. The automatic timer will turn the oven **on and off** at the time you select in advance.

#### To set the control for the Self-Cleaning Cycle to start at a delayed time and shut off automatically (example: 3 hour self-clean cycle to start at 4:30)

1. Be sure the clock is set with the correct time of day and the oven door is closed.
2. Press **SELF CLEAN**. "CLn" and "3:00" HR will show in the display. The control will automatically clean for a 3 hour period.

#### NOTE

If a 2 or 4 hour clean time is desired, press **SELF CLEAN** multiple times to toggle between 2, 3 or 4 hours.

3. Press **START**. "door Loc" will appear, a beep will sound and the "DOOR" and  icon will flash; the letters "CLn" will appear in the display as soon as the door is locked.
4. As soon as the control is set, the motor driven oven door lock will begin to close automatically. Once the door has been locked the "DOOR" and  icon indicator light will quit flashing and remain on.
5. Press **DELAY START**. Enter the desired start time using the number pads **4 3 0**.
6. Press **START**. "DELAY", "DOOR" and  icon icons will remain on.
7. The control will start the self-cleaning at the set start time, for the period of time previously selected. At that time, the icon "DELAY" will go out; "CLn" and oven icon will appear in the display.

#### When the Self-Clean Cycle is Completed

1. "HOT" will appear in the display. The time of day, the "DOOR" and  icon will remain in the display.
2. Once the oven has cooled down for approximately 1 HOUR, "door OPn" will appear and the "DOOR" and  icon will flash until the door is unlocked, the oven door can then be opened and the timer will revert back to the time of the day.

#### Stopping or Interrupting a Self-Cleaning Cycle

If it becomes necessary to stop or interrupt a self-cleaning cycle due to excessive smoke or fire in the oven:

1. Press **CANCEL**.
2. The oven door can only be opened after the oven has cooled down for approximately 1 HOUR, "door OPn" will appear and the "DOOR" and  icon will flash until the door is unlocked, the oven door can then be opened and the timer will revert back to the time of the day.

#### NOTE

**Models B & C only**, during self-clean cycle surface elements can not be used (see ESEC Lockout Feature)

# SETTING KEEP WARM DRAWER CONTROL (If equipped)

## Keep warm drawer rack positions

The rack can be used in 2 ways:

- In the **upright position** (Figure 1) to allow low profile food items to be placed both under and on top of the rack (for example, rolls or biscuits on top of the rack and a casserole dish underneath).
- In the **downward position** (Figure 2) to allow you to place light weight food items and empty dishware (for example, rolls or pastries and dinner plates) on the rack.

Set the keep warm drawer rack in either position.

Figure 1

Figure 2

## Operating the keep warm drawer

The purpose of the keep warm drawer is to keep hot cooked foods at serving temperature. Always start with hot food. It is not recommended to heat cold food in the keep warm drawer. All food placed in the keep warm drawer should be covered with a lid or aluminum foil to maintain quality. Do not use plastic wrap to cover food. Plastic may melt onto the drawer and be very difficult to clean. Use only utensils and cookware recommended for oven use in the keep warm drawer.

**⚠ CAUTION** Always use potholders or oven mitts when removing food from the keep warm drawer as cookware and plates will be hot and you can be burned.

## To set the keep warm drawer controls

The control and indicator lights for the keep warm drawer features are located on the control panel. The temperatures are approximate, and are designated by HI (high), MED (medium) and LO (low).

1. Touch the **on•off** pad (see Figure 6) at the keep warm drawer control position. The keep Warm drawer indicator light will flash. Note: If no further pads are touched within 25 seconds the request to power the keep warm drawer ON will clear.
2. Set the desired power level. Touch **^** once to turn ON the power level for HI (see Figure 3) or **v** to turn ON the power level for LO (see Figure 5). The keep warm drawer indicator light located beside the **on•off** pad will turn ON steady.
3. Each touch of the **v** or **^** pads will decrease or increase through 5 power levels from HI (see Figure 3) to MED (see Figure 4) to LO (see Figure 5).

**Note:** For best results, preheat the keep warm drawer before adding the food. An empty drawer will preheat in approximately 15 minutes.

4. When the food is ready for removal, touch the **on•off** pad once to turn the keep warm drawer OFF. The keep warm drawer indicator light will turn OFF.

Figure 3

Figure 4

Figure 5

Figure 6

## NOTE

The keep warm drawer is inoperable during the self-clean cycle.

The keep warm drawer is equipped with a latch which may require extra force when opening and closing the drawer.

## Keep warm drawer temperature selection

Recommended keep warm drawer settings table is shown below. If a particular food is not listed, start with the MED setting. If more crispness is desired, remove the lid or aluminum foil from the food. Most foods can be kept at serving temperatures on the MED setting. When a combination of foods are to be kept warm (for instance, meat with 2 vegetables and rolls), use the HI setting. To avoid heat loss, do not open the keep warm drawer while in use.

Keep warm drawer recommended food settings table	
Food Item	Setting
Bacon, Hamburger Patties	HI
Poultry, Pork Chops	HI
Fried Foods, Pizza	HI
Gravies, Casseroles	MED
Vegetables, Eggs	MED
Roasts (Beef, Pork, Lamb)	MED
Biscuits, Pastries	MED
Rolls, hard	MED
Rolls (soft)	LO
Empty Dinner Plates	LO

## CARE & CLEANING (Cleaning Chart)

### Cleaning various parts of your appliance

Before cleaning any part of the appliance, be sure all controls are turned off and the appliance is COOL. REMOVE SPILLOVERS AND HEAVY SOILING AS SOON AS POSSIBLE. REGULAR CLEANING WILL REDUCE THE NUMBER OF MAJOR CLEANING LATER.

Surfaces	How to Clean
Aluminum (trim pieces) & Vinyl	Use hot, soapy water and a cloth. Dry with a clean cloth.
Glass, Painted and Plastic Body Parts, Control Knobs & Decorative Trim Pieces	Using a soft cloth, clean with mild dish detergent and water or a 50/50 solution of vinegar and water. Follow by rinsing the area with clean water; dry and polish with a soft cloth. Glass cleaners may be used if sprayed on a soft cloth first. <b>DO NOT</b> spray liquids directly on the control pad and display area. Do not use large amounts of water on the control panel - excess water on the control area may cause damage to the appliance. Do not use other liquid cleaners, abrasive cleaners, scouring pads, or paper towels - they will damage the finish. To remove control knobs, turn to the OFF position; grasp firmly and pull straight off the shaft. To replace knobs after cleaning, line up the flat sides of both the knob and the shaft; then push the knob into place.
Control Panels	Before cleaning the control panel, turn all controls to OFF and remove the control knobs. To remove, pull each knob straight off the shaft. Clean as instructed above. Squeeze excess water from the cloth before wiping the panel; especially when wiping around the controls. Excess water in or around the controls may cause damage to the appliance. To replace knobs after cleaning, line up the flat sides of both the knob and the shaft; then push the knob into place.
Porcelain Enamel Burner Grates, Cooktop Surface, Below Cooktop, Broiler Pan & Insert (some models), Door Liner, Oven Bottom & Burner Drip Pans	Clean burner grates, broiler pan and insert (some models) in the dishwasher and dry upon removal. If soils are not removed, follow the cooktop cleaning instructions below.  Gentle scouring with a soapy scouring pad will remove most spots. Rinse with a 1:1 solution of clear water and ammonia. If necessary, cover difficult spots with an ammonia-soaked paper towel for 30 to 40 minutes. Rinse with clean water and a damp cloth, then scrub with a soap-filled scouring pad. Rinse and wipe dry with a clean cloth. Remove all cleaners or the porcelain may become damaged during future heating. <b>DO NOT</b> use spray oven cleaners on the cooktop.
Easy Care™ Stainless Steel Oven Door & Drawer Front Panel and Decorative Trim	Your range finish is may be made with Easy Care™ Stainless Steel (some models). Clean the stainless with warm soapy water using a clean sponge or cloth. Rinse with clean water and dry with a soft clean cloth. <b>DO NOT</b> use ANY store bought cleaners like Stainless Steel cleaners or any other types of cleaners containing any abrasive, chlorides, chlorines or ammonia. It is recommended to use mild dish soap and water or a 50/50 solution of water and vinegar.
Oven Racks 	Remove racks. See «To remove and to replace an oven rack» under Oven vent(s) and racks. Use a mild, abrasive cleaner, following manufacturer's instructions. Rinse with clean water and dry. After cleaning the racks, rub the sides of the racks with wax paper or a cloth containing a small amount of baby oil or salad oil (this will make the racks glide easier into the rack positions).
Oven Door 	Use soap & water to thoroughly clean the top, sides and front of the oven door. Rinse well. You may use a glass cleaner on the outside glass of the oven door. <b>DO NOT</b> immerse the door in water. <b>DO NOT</b> spray or allow water or the glass cleaner to enter the door vents. <b>DO NOT</b> use oven cleaners, cleaning powders or any harsh abrasive cleaning materials on the outside of the oven door.  <b>DO NOT</b> clean the oven door gasket. The oven door gasket is made of a woven material, on Self-Cleaning models, which is essential for a good seal. Care should be taken not to rub, damage or remove this gasket.

## Ceramic glass cooktop cleaning & maintenance

**Consistent and proper cleaning is essential to maintaining your Ceramic glass cooktop.**

Prior to using your cooktop for the first time, apply the recommended CERAMA BRYTE® Cleaning Creme to the ceramic surface. Clean and buff with a non abrasive cloth or pad. This will make cleaning easier when soiled from cooking. The special cooktop cleaning cream leaves a protective finish on the glass to help prevent scratches and abrasions.

Sliding aluminum or copper clad bottom pans on the cooktop can cause metal markings on the cooktop surface. These marks should be removed **immediately** after the cooktop has cooled using the cooktop cleaning cream. Metal marks can become permanent if not removed prior to future use.

Cookware (cast iron, metal, ceramic or glass) with rough bottoms can mark or scratch the cooktop surface. **Do not slide anything metal or glass** across the cooktop. **Do not** use your cooktop as a cutting board or work surface in the kitchen. **Do not** cook foods directly on the cooktop surface without a pan. **Do not** drop heavy or hard objects on the glass cooktop, or they may crack it.

## Cleaning recommendations for the ceramic glass cooktop

### ! CAUTION

Before cleaning the cooktop, be sure the controls are turned to **OFF** and the cooktop is **COOL**.

### ! WARNING

**DO NOT** use a cooktop cleaner on a hot cooktop. The fumes can be hazardous to your health, and can chemically damage the ceramic glass surface.

### For light to moderate soil:

Apply a few drops of CookTop® Cleaning Creme directly to the cooktop. Use a paper towel or use a **non-abrasive** plastic type **no-scratch** pad to clean the entire cooktop surface. Make sure the cooktop is cleaned thoroughly, leaving no residue.

### For heavy, burned on soil:

Apply a few drops of CookTop® Cleaning Creme directly to the soiled area. Rub the soiled area using a **non-abrasive** plastic type **no-scratch** pad, applying pressure as needed. Do not use the pad you use to clean the cooktop for any other purpose.

### ➔ IMPORTANT

Damage to the ceramic glass cooktop may occur if you use an abrasive type scratch pad. Only use cleaning products that have been specifically designed for ceramic glass cooktop.

If soils remain, carefully scrape soils with a metal razor blade scraper, holding scraper at a 30 degree angle to the surface. Remove loosened soils, then apply a few drops of cleaning cream and buff surface clean.

## CARE & CLEANING

### Cleaning recommendations for the ceramic glass cooktop (continued)

#### Plastic or foods with a high sugar content:

These types of soils need be removed immediately if spilled or melted onto the ceramic cooktop surface. Permanent damage (such as pitting of the cooktop surface) may occur if not removed **immediately**. After turning the surface elements OFF, use a razor blade scraper or a metal spatula with a mitt and scrape the soil from the hot surface (as illustrated). Allow the cooktop to cool, and use the same method for heavy or burned on soils.

#### Do not use the following on the ceramic glass cooktop:

- Do not use abrasive cleaners and scouring pads, such as metal and some nylon pads. They may scratch the cooktop, making it more difficult to clean.
- Do not use harsh cleaners, such as chlorine bleach, ammonia or oven cleaners, as they may etch or discolor the cooktop.
- Do not use dirty sponges, cloths or paper towels, as they can leave soil or lint on the cooktop which can burn and cause Special Caution for Aluminum Foil and Aluminum Cooking Utensils

- **Aluminum foil**  
Use of aluminum foil will damage the cooktop. Do not use under any circumstances.
- **Aluminum utensils**  
Since the melting point of aluminum is much lower than that of other metals, care must be taken when aluminum pots or pans are used. Pans that boil dry may permanently damage cooktop by breaking, fusing to, or marking it.

### Care and cleaning of stainless steel

Some models are equipped with stainless steel exterior parts. Special care and cleaning are **required** for maintaining the appearance of stainless parts. Refer to the **General Care & Cleaning** table for detailed cleaning instructions.

### Removing and replacing the lift-off oven door

#### CAUTION

The door is heavy. For safe, temporary storage, lay the door flat with the inside of the door facing down.

#### To Remove Oven Door:

1. Open oven door completely (horizontal with floor - See Figure 1).
2. Pull the door hinge locks on both left and right door hinges down from the oven frame completely towards the oven door (See Figure 2). A tool such as a small flat-blade screwdriver may be required.
3. Firmly grasp both sides of oven door along the door sides (Do not use the oven door handle - See Figure 3).
4. Close the door to the broil stop position (the oven door will stop into this position just before fully closing).
5. With the oven door in the broil stop position, lift the oven door hinge arms over the roller pins located on each side of the oven frame (See Figure 4).

#### To Replace Oven Door:

1. Firmly grasp both sides of oven door along the door sides (Do not use the oven door handle - See Figure 3).
2. Holding the oven door at the same angle as the removal position, seat the hook of the hinge arm over the roller pins located on each side of the oven door frame (See Figure 4). The hook of the hinge arms must be fully seated onto the roller pins.
3. Fully open the oven door (horizontal with floor - See Figure 1).
4. Push the door hinge locks up towards and into the oven frame on both left and right oven door hinges (See Figure 2) to the locked position.
5. Close the oven door.

Door Hinge locations  
with oven door fully open

Figure 1

Figure 2

Figure 3

Figure 4

## Special door care instructions - Most oven doors contain glass that can break.

Read the following recommendations:

1. Do not close the oven door until all the oven racks are fully in place.
2. Do not hit the glass with pots, pans, or any other object.
3. Scratching, hitting, jarring or stressing the glass may weaken its structure causing an increased risk of breakage at a later time.

## To remove the "hidden bake" cover (some models)

1. In order to remove the "hidden bake" cover, pull the back edge with one hand about 1/2" inch and lift up the "hidden bake" cover with both hands (See picture).
2. When reinstalling the "hidden bake" cover, be sure to put it all the way to the back of the oven and lay it down on the 2 shoulder screws. Then push the front edge of the cover in its place below the front bracket.

To have easier access to the "hidden bake" cover, you can remove the oven door by following the instructions on previous page.

**IMPORTANT:** Always replace the "hidden bake" cover before the next use.

## Changing oven light

### CAUTION

Be sure the oven is unplugged and all parts are **COOL** before replacing the oven light bulb. Do not turn the oven light on during a self-cleaning cycle. High temperature will reduce lamp life.

On some models an interior oven light will turn on automatically when the oven is opened. The oven light may be turned on when the door is closed by using the oven light switch located on the Electronic Oven control. The oven light bulb is covered with a glass shield held in place by a wire holder. **THIS GLASS SHIELD MUST ALWAYS BE IN PLACE WHEN THE OVEN IS IN USE.**

### CAUTION

**BE SURE OVEN IS COOL**

## To Replace the Light Bulb:

1. Turn the power off at the main source.
2. Wear a leather-faced glove for protection against possible broken glass.
3. Replace bulb with a 40 Watt appliance bulb only.
4. For self-cleaning oven, press wire holder to one side to release glass shield, change bulb and be sure to replace glass shield.

## CARE & CLEANING

### To remove and replace storage drawer with extendible glide (some models)

#### To Remove Storage Drawer

1. Open the drawer to the fully opened position.
2. Locate the latches on both sides of the warmer drawer.
3. Pull up on the left glide latch and push down on the right glide latch.
4. Pull the drawer away from the appliance.

#### To Replace Storage Drawer

1. Align the glide latches on both sides of the drawer with the slots on the drawer.
2. Push the drawer back into the appliance.

### To remove and replace keep warm drawer (some models)

#### **WARNING**

Turn power off before removing the warmer drawer.

#### To remove keep warmer drawer

1. Open the drawer to the fully opened position.
2. Locate the latches on both sides of the keep warm drawer.
3. Pull up on the left glide latch and push down on the right glide latch.
4. Pull the drawer away from the appliance.
5. To clean keep warm drawer, gently scour with a soapy scouring pad, this will remove most spots. Rinse with a 1:1 solution of clear water and ammonia. If necessary, cover difficult spots with an ammonia-soaked paper towel for 30 to 40 minutes. Rinse with clean water and a damp cloth. Remove all cleaners or the porcelain may become damaged during future heating. **DO NOT** use spray oven cleaners on the cooktop.

#### To replace keep warm drawer

1. Align the glide latches on both sides of the drawer with the slots on the drawer.
2. Push the drawer back into the appliance.

#### **WARNING**

Turn the keep warm drawer control knob to OFF before removing the drawer. **DO NOT** touch the keep warm drawer element. The element may still be hot enough to cause burns, even if it is dark in color.

#### **WARNING**

**Electrical Shock Hazard** can occur and result in serious injury or death. Disconnect appliance from electric power before cleaning and servicing the keep warm drawer.

## BEFORE YOU CALL (Solutions to Common Problems)

### Oven baking

For best cooking results, heat the oven before baking cookies, breads, cakes, pies or pastries, etc. There is no need to preheat the oven for roasting meat or baking casseroles.

The cooking times and temperatures needed to bake a product may vary slightly from your previously owned appliance.

**Baking Problems and Solutions Chart**

Baking Problems	Causes	Corrections
<p><b>Cookies and biscuits burn on the bottom.</b></p> 	<ul style="list-style-type: none"> <li>• Cookies and biscuits put into the oven before the preheating time is completed.</li> <li>• Oven rack overcrowded.</li> <li>• Dark pan absorbs heat too fast.</li> </ul>	<ul style="list-style-type: none"> <li>• Allow oven to preheat to the selected temperature before placing food in oven.</li> <li>• Choose pan sizes that will permit 5.1cm to 10.2cm (2" to 4") of air space on all sides when placed in the oven.</li> <li>• Use a medium-weight aluminum baking sheet.</li> </ul>
<p><b>Cakes too dark on top or bottom.</b></p> 	<ul style="list-style-type: none"> <li>• Cakes put into the oven before preheating time is completed.</li> <li>• Rack position too high or low.</li> <li>• Oven too hot.</li> </ul>	<ul style="list-style-type: none"> <li>• Allow oven to preheat to the selected temperature before placing food in the oven.</li> <li>• Use proper rack position for baking needs.</li> <li>• Set oven temperature 25°F/12°C lower than recommended.</li> </ul>
<p><b>Cakes not done in the center.</b></p> 	<ul style="list-style-type: none"> <li>• Oven too hot.</li> <li>• Incorrect pan size.</li> <li>• Pan not centered in oven.</li> </ul>	<ul style="list-style-type: none"> <li>• Set oven temperature 25°F/12°C lower than recommended.</li> <li>• Use pan size suggested in recipe.</li> <li>• Use proper rack position and place pan so there is 5.1cm to 10.2cm (2" to 4") of space on all sides of pan.</li> </ul>
<p><b>Cakes not level.</b></p> 	<ul style="list-style-type: none"> <li>• Range not level.</li> <li>• Pan too close to oven wall or rack overcrowded.</li> <li>• Pan warped.</li> </ul>	<ul style="list-style-type: none"> <li>• Place a marked glass measuring cup filled with water on the center of the oven rack. If the water level is uneven, refer to the installation instructions for leveling the range.</li> <li>• Be sure to allow 5.1cm to 10.2cm (2" to 4") of clearance on all sides of each pan in the oven.</li> <li>• Do not use pans that are dented or warped.</li> </ul>
<p><b>Foods not done when cooking time is up.</b></p> 	<ul style="list-style-type: none"> <li>• Oven too cool.</li> <li>• Oven overcrowded.</li> <li>• Oven door opened too frequently.</li> </ul>	<ul style="list-style-type: none"> <li>• Set oven temperature 25°F/12°C higher than suggested and bake for the recommended time.</li> <li>• Be sure to remove all pans from the oven except the ones to be used for baking.</li> <li>• Open oven door only after shortest recommended baking time.</li> </ul>

## BEFORE YOU CALL (Solutions to Common Problems)

### IMPORTANT

**Before you call for service,** review this list. It may save you time and expense. The list includes common occurrences that are not the result of defective workmanship or materials in this appliance.

OCCURRENCE	POSSIBLE CAUSE/SOLUTION
<b>Range is not level.</b>	<p>Poor installation. Place oven rack in center of oven. Place a level on the oven rack. Adjust leveling legs at base of range until the rack is level. When range is level, cooktop may appear out of alignment if countertop is not level.</p> <p>Weak, unstable floor. Be sure floor is level and can adequately support range. If floor is sagging or slopping, contact a carpenter to correct the situation.</p> <p>Kitchen cabinet misalignment may make range appear to be unlevel. Be sure cabinets are square and have sufficient room for range clearance.</p>
<b>Cannot move appliance easily. Appliance must be accessible for service.</b>	<p>Cabinets not square or are built in too tight. Contact a cabinet maker to correct the problem.</p> <p>Contact builder or installer to make appliance accessible.</p> <p>Carpet interferes with range. Provide sufficient space so range can be lifted over carpet.</p> <p>Gas line is hard-plumbed. Have a flexible C.S.A international approved metal appliance connector installed.</p>
<b>Entire range or oven does not operate.</b>	<p>Make sure cord/plug is plugged tightly into outlet.</p> <p>Service wiring is not complete. Call an authorized servicer.</p> <p>Electrical power outage. Check house lights to be sure. Call your local electric company for service.</p>
<b>Cooktop control displays any E code error (ex.: E014)</b>	<p>An error message will be displayed (glowing "Er") at power up (or after a power failure) if ANY of the surface control knobs were left in the ON positions (Figure 8). If a power failure should occur, be sure to set all of the surface control knobs to the OFF position. This will reset the surface controls.</p> <p>Also, if the induction sensors cannot detect a pan made of the correct material or if the pan is not centered properly or if the pan is too small, the power level will flash in the in the digital display and the pan will not heat. After 3 minutes, an "Er" error code will be displayed until the controls are set to OFF.</p> <p>If the surface controls do not function and the "ER" message remains in any display after following these procedures, contact your authorized servicer for assistance.</p> <p>Cooktop control has detected a fault or error condition. Try turning electrical power supply OFF and back ON to the appliance in order to reset main controls. If fault recurs, record fault number and unplug the appliance.</p>
<b>Oven control beeps and displays any F code error (ex.: F11)</b>	<p>Electronic control has detected a fault condition. Press <b>CANCEL</b> to clear the display and stop beeping. Reprogram oven. If fault recurs, record fault number. Press <b>CANCEL</b> and call an authorized servicer for assistance.</p>
<b>Oven light does not work.</b>	<p>Replace or tighten bulb. See Changing Oven Light section in this Use &amp; Care Guide.</p> <p>Electrical power outage. Check house lights to be sure. Call your local electric company for service.</p>
<b>Surface unit does not heat.</b>	<p>No power to the appliance. Check steps under "Entire Range or Oven Does Not Operate" in this Before you Call checklist.</p> <p>No cookware was placed on the induction cooking zones or the cookware material type is incorrect for induction cooking.</p> <p>Incorrect control setting. Make sure the correct control is on for the surface unit to be used.</p>
<b>Surface units too hot or not hot enough.</b>	<p>Incorrect control setting. Make sure the correct control is on for the surface unit to be used.</p> <p>Lightweight or warped pans used. Use only flat, evenly balanced, medium or heavyweight cookware. Flat pans heat better than warped pans. Cookware materials and weight of the material affect heating. Heavy-and medium- weight pans heat evenly. Because lightweight pans heat unevenly, foods may burn easily.</p>
<b>Drip bowls are pitting or rusting.</b>	<p>Foods with acids, such as tomatoes, if allowed to stand in/on bowls will cause corrosion.</p> <p>Remove and wash drip bowls as soon as possible after spillover.</p> <p>Normal environment. Houses along sea coast are exposed to salt air. Protect bowls as much as possible from direct exposure to salt air.</p>

## BEFORE YOU CALL (Solutions to Common Problems)

OCCURRENCE	POSSIBLE CAUSE/SOLUTION
<b>Drip bowls turning color or distorted out of shape.</b>	Bottom surface of cookware extends beyond surface elements and touches cooktop surface. This can cause high enough temperatures to discolor the drip bowls. DO NOT use cookware of this type. Pan sizes should be matched to the size of the element. Replacement drip bowls may be purchased from your dealer.
<b>Metalmarks.</b>	Sliding or scraping of metal utensils on cooktop surface. Do not slide metal utensils on cooktop surface. Use a ceramic-glass cooktop cleaning cream to remove the marks. "Cooktop Cleaning - Ceramic Glass Cooktop Models" section under General Cleaning.
<b>Scratches or abrasions on cooktop surface.</b>	Coarse particles such as salt or sand between cooktop and utensils can cause scratches. Be sure cooktop surface and bottoms of utensils are clean before usage. Small scratches do not affect cooking and will become less visible with time. Cleaning materials not recommended for ceramic-glass cooktop have been used. See "Cooktop Cleaning - Ceramic Glass Cooktop Models" section under General Cleaning. Cookware with rough bottom has been used. Use smooth, flat-bottomed cookware.
<b>Brown streaks or specks.</b>	Boilovers are cooked onto surface. Use razor blade scraper to remove soil. "Cooktop Cleaning - Ceramic Glass Cooktop Models" section under General Cleaning.
<b>Areas of discoloration with metallic sheen.</b>	Mineral deposits from water and food. Remove using a ceramic-glass cooktop cleaning cream. Use cookware with clean, dry bottoms.
<b>Poor baking results.</b>	Many factors affect baking results. Make sure the proper rack position is used. Center food in the oven and space pans to allow air to circulate. Allow the oven to preheat to the set temperature before placing food in the oven. Try adjusting the recipes' recommended temperature or baking time. If you feel the oven is too hot or cool, see "Adjusting Your Oven Temperature" section in the Electronic Oven Control Guide.
<b>Fan noise during cooking operation.</b>	A cooling fan may automatically turn on and off to cool internal parts. It is normal, and the fan may continue to run even after oven is turned off.
<b>Flames inside oven or smoking from vent.</b>	Excessive spillovers in oven. Set self-clean cycle for a longer cleaning time. Excessive spillovers in oven. This is normal, especially for pie spillovers or large amounts of grease on the oven bottom. Wipe up excessive spillovers before starting the self-clean cycle. If flames or excessive smoke are present, stop the self-clean cycle and follow the steps under "Stopping or Interrupting the Self-Cleaning Cycle" in the Electronic Oven Control Guide.
<b>Oven smokes excessively during broiling.</b>	Control(s) not set properly. Follow instructions under "Setting Oven Controls". Make sure oven is opened to Broil Stop Position. Meat too close to the element. Reposition the rack to provide proper clearance between the meat and the element. Preheat broil element. Preheat broil element for searing. Grid on broiler pan wrong side up and grease not draining. Always place grid on the broiler pan with ribs up and slots down to allow grease to drip into pan. Grease has built up on oven surfaces. Regular cleaning is necessary when broiling frequently. Old grease or food spatters cause excessive smoking. Control(s) not set properly. Follow instructions under "Oven Cleaning" in the Electronic Oven Control Guide.
<b>Self-cleaning cycle does not work.</b>	Control(s) not set properly. Follow instructions under "Oven Cleaning" in the Electronic Oven Control Guide. Self-cleaning cycle was interrupted. Stop time must be 2 to 4 hours past the start time. Follow steps under "Stopping or Interrupting the Self-Cleaning Cycle" in the Electronic Oven Control Guide.
<b>Soil not completely removed after self-cleaning cycle.</b>	Set Self-Clean cycle for a longer cleaning time. Failure to clean bottom front, top of oven or door areas outside oven seal. These areas are not in the Self-Cleaning area, but get hot enough to burn on food residue. Clean these areas before starting the Self-Clean cycle. Burned-on residue may be cleaned with a stiff nylon brush and water or nylon scrubber. Be careful not to damage the oven gasket.
<b>Excessive smoking from oven vent.</b>	Excessive spillovers in oven, especially for pie spillovers or large amounts of grease on the oven bottom. Wipe up excessive spillovers before starting the Self-Clean cycle. If flames or excessive smoke are present, stop the Self-Clean cycle and follow the steps under "Stopping or Interrupting the Self-Cleaning Cycle"» in the Electronic Oven Control Guide.

## MAJOR APPLIANCE WARRANTY

Your appliance is covered by a one year limited warranty. For one year from your original date of purchase, Electrolux will pay all costs for repairing or replacing any parts of this appliance that prove to be defective in materials or workmanship when such appliance is installed, used and maintained in accordance with the provided instructions.

**Exclusions This warranty does not cover the following:**

1. Products with original serial numbers that have been removed, altered or cannot be readily determined.
2. Product that has been transferred from its original owner to another party or removed outside the USA or Canada.
3. Rust on the interior or exterior of the unit.
4. Products purchased "as-is" are not covered by this warranty.
5. Food loss due to any refrigerator or freezer failures.
6. Products used in a commercial setting.
7. Service calls which do not involve malfunction or defects in materials or workmanship, or for appliances not in ordinary household use or used other than in accordance with the provided instructions.
8. Service calls to correct the installation of your appliance or to instruct you how to use your appliance.
9. Expenses for making the appliance accessible for servicing, such as removal of trim, cupboards, shelves, etc., which are not a part of the appliance when it is shipped from the factory.
10. Service calls to repair or replace appliance light bulbs, air filters, water filters, other consumable, or knobs, handles, or other cosmetic parts.
11. Surcharges including, but not limited to, any after hour, weekend, or holiday service calls, tolls, ferry trip charges, or mileage expense for service calls to remote areas, including the state of Alaska.
12. Damages to the finish of appliance or home incurred during installation, including but not limited to floors, cabinets, walls, etc.
13. Damages caused by: services performed by unauthorized service companies; use of parts other than genuine Electrolux parts or parts obtained from persons other than authorized service companies; or external causes such as abuse, misuse, inadequate power supply, accidents, fires, or acts of God.

**DISCLAIMER OF IMPLIED WARRANTIES; LIMITATION OF REMEDIES**

Customer's sole and exclusive remedy under this limited warranty shall be product repair or replacement as provided herein. Claims based on implied warranties, including warranties of merchantability or fitness for particular purpose, are limited to one year or the shortest period allowed by law, but not less than one year. Electrolux shall not be liable for consequential or incidental damages such as property damage and incidental expenses resulting from any breach of this written limited warranty or any implied warranty. Some states and provinces do not allow the exclusion or limitation of incidental or consequential damages, or limitations on the duration of implied warranties, so these limitations or exclusions may not imply to you. This written warranty gives you specific legal rights. You may also have other rights that vary from state to state.

**If You  
Need  
Service**

Keep your receipt, delivery slip, or some other appropriate payment record to establish the warranty period should service be required. If service is performed, it is in your best interest to obtain and keep all receipts. Service under this warranty must be obtained contacting Electrolux at the addresses or phone numbers below.

This warranty only applies in the USA and Canada. In the USA, your appliance is warranted by Electrolux Major Appliances North America, a division of Electrolux Home Products, Inc. In Canada, your appliance is warranted by Electrolux Canada Corp. Electrolux authorizes no person to change or add to any obligations under this warranty. Obligations for service and parts under this warranty must be performed by Electrolux or an authorized service company. Product features or specifications as described or illustrated are subject to change without notice.
